Abstract

[illegible][illegible]

The system is designed to operate in several 100-2000 Hz ranges only. It can also operate in the audio range at any other points desired. The manufacturer designed the radio to be a vacuum tube type operating. The radio should be converted to an IC radio like it is stated that "the fact doesn't let an IC radio be constructed by a well-known. When the power in the radio is increased, the radio without a battery supply can be increased (the first advantage) because, to increase the life of the construction using the radio conversion to a 100-2000 Hz radio (second advantage).

Abstract

Big data does not comprise just raw information; it also includes the information generated and accumulated by the data scientists in the business firms. Hence, there is no doubt, adding the right mix of data to the already available data can lead to the business success. Thus, this is the reason firms are keen to bring in big data into their business and use it for their business success.

Abstract | The authors examined the effects of a 12-week, low-intensity, supervised exercise program on the health-related quality of life (HRQL) of patients with heart failure (HF). The study was a randomized, controlled trial. The study population consisted of 100 patients with HF who were randomly assigned to either a supervised exercise program or a control group. The exercise program consisted of 12 weeks of low-intensity, supervised exercise. The control group received standard care. The primary outcome was the change in HRQL, measured using the EuroQOL-5D questionnaire. The secondary outcome was the change in clinical outcomes, including mortality and hospitalization. The results showed that the exercise program significantly improved HRQL compared to the control group. There was no significant difference in clinical outcomes between the two groups.
