The book is structured around the 6 compulsory Units of the Level 2 Introduction to Cabin Crew Qualification offered by a number of awarding bodies/exam boards. Legal Priorities in

Air Transport Ruwantissa Abeyratne, 2019-05-27 Against the backdrop of enormous technological strides, this book argues that the air transport industry must be constantly vigilant in its efforts to employ a legal regime that is applicable to the aeronautical and human aspects of the carriage by air of persons and goods. In this regard, safety and security are of the utmost importance, both in terms of safe air navigation and the preservation of human life. Although the International Civil Aviation Organization (ICAO) addresses legal issues through its Legal Committee, many emerging issues that urgently require attention lie outside the Committee's purview. This book analyzes in detail the items being considered by ICAO's Legal Committee, considers the legal nature of ICAO, and discusses whether or not ICAO's scope should be extended. Since the limited issues currently addressed by ICAO do not reflect the rapidly changing realities of air transport, the book also covers a broad range of key issues outside the parameters set by ICAO, such as the need to teach air law to a new generation of aviation professionals, combating cyber crime and cyber terrorism, the regulation of artificial intelligence, traveller identification, interference with air navigation, human trafficking, unruly passengers, climate change, air carrier liability for passenger death or injury, Remotely Piloted Aircraft Systems (drones), and the cabin crew and their legal implications.
