Glocalized Solutions for Sustainability in Manufacturing Jürgen Hesselbach,Christoph Herrmann,2011-03-19 The 18th CIRP International Conference on Life Cycle Engineering LCE 2011 continues a long tradition of scientific meetings focusing on the exchange of industrial and academic knowledge and experiences in life cycle assessment product development sustainable manufacturing and end of life management The theme Glocalized Solutions for Sustainability in Manufacturing addresses the need for engineers to develop solutions which have the potential to address global challenges by providing products services and processes taking into account local capabilities and constraints to achieve an economically socially and environmentally sustainable society in a global perspective Glocalized Solutions for Sustainability in Manufacturing do not only involve products or services that are changed for a local market by simple substitution or the omitting of functions Products and services need to be addressed that ensure a high standard of living everywhere Resources required for manufacturing and use of such products are limited and not evenly distributed in the world Locally available resources local capabilities as well as local constraints have to be drivers for product and process innovations with respect to the entire life cycle The 18th CIRP International Conference on Life Cycle Engineering LCE 2011 serves as a platform for the discussion of the resulting challenges and the collaborative development of new scientific ideas      *Economic Analysis Handbook* ,1993

**The Economics of Human Systems Integration** William B. Rouse,2011-04-22 Fundamental Economic Principles Methods and Tools for Addressing Human Systems Integration Issues and Tradeoffs Human Systems Integration HSI is a new and fundamental integrating discipline designed to help move business and engineering cultures toward more human centered systems Integrating consideration of human abilities limitations and preferences into engineering systems yields important cost and performance benefits that otherwise would not have been accomplished In order for this new discipline to be effective however a cultural change starting with organizational leadership is often necessary The Economics of Human Systems Integration explains the difficulties underlying valuation of investments in people s training and education safety

and health and work productivity It provides an overview of how the field of economics addresses these difficulties focusing on human issues associated with design development production operations maintenance and sustainment of complex systems The set of thought leaders recruited as contributors to this volume collectively provides a compelling set of data and principles for assessing the economic value of investing in people not just in general but in specific investment situations The early chapters provide the contexts for HSI and investment analysis illustrating the enormous difference context makes in how issues are best framed and analyzed A host of practical methods and tools for investment valuation are then presented Provided are A variety of real world applications of economic analysis ranging from military acquisition and automotive investment to healthcare and high tech investments in general in both the U S and abroad A range of economics based methods and tools for cost analysis cost benefit analysis and investment analysis as well as sources of data for performing such analyses Differing perspectives on economic decision making including a range of private sector points of view as well as government and regulatory perspectives In addition five real world case studies illustrate how such valuations have been done and their major impacts on investment decisions HSI professionals systems engineers and finance professionals who address investment analysis will appreciate the wide range of methods and real life applications senior undergraduates and masters level graduate students will find this to be an excellent textbook that provides theory and supports practice
