**The Publishers' Trade List Annual**, 1985 **Machine and Deep Learning Solutions for Achieving the Sustainable Development Goals** Ruiz-Vanoye, Jorge A., Díaz-Parra, Ocotlán, 2025-03-07

Achieving the United Nations Sustainable Development Goals SDGs requires innovative solutions that address global challenges such as climate change poverty and social inequality Artificial intelligence AI machine learning and data driven technologies offer transformative potential by optimizing resource management improving healthcare outcomes and enhancing decision making processes However integrating AI into sustainable development efforts presents ethical technical and policy related challenges that must be carefully navigated A multidisciplinary approach is essential to ensure these technologies are applied inclusively and responsibly maximizing their positive societal impact Machine and Deep Learning Solutions for Achieving the Sustainable Development Goals enhances understanding and application of machine learning deep learning data mining and AI technologies in the context of the SDGs It fills the gap by linking theory and practice and addresses both the opportunities and challenges inherent in this intersection Covering topics such as demand side

management agricultural productivity and smart manufacturing this book is an excellent resource for engineers computer scientists practitioners policymakers professionals researchers scholars academicians and more *Product-Service Integration for Sustainable Solutions* Horst Meier, 2013-03-14 An Industrial Product Service System is characterized by the integrated and mutually determined planning development provision and use of product and service shares including its immanent software components in Business to Business applications and represents a knowledge intensive socio technical system Meier Roy Seliger 2010 Since the first conference in 2009 the CIRP International Conference on Industrial Product Service Systems has become a well established international forum for the review and discussion of advances research

results and industrial improvements Researchers from all over the world have met at previous IPS2 conferences in Cranfield 2009 Link ping 2010 Braunschweig 2011 and Tokyo 2012 In 2013 the 5th CIRP International Conference on Industrial Product Service Systems is held in Bochum Important topics of IPS2 research presented at the conference are planning and development sustainability business models operation service engineering knowledge management ICT modeling and simulation marketing and economic aspects as well as the role of the human in IPS2      Tunnel Engineering Michael Sakellariou,2020-03-18 This volume presents a selection of chapters covering a wide range of tunneling engineering topics The scope was to present reviews of established methods and new approaches in construction practice and in digital technology tools like building information modeling The book is divided in four sections dealing with geological aspects of tunneling analysis and design new challenges in tunnel construction and tunneling in the digital era Topics from site investigation and rock mass failure mechanisms analysis and design approaches and innovations in tunnel construction through digital tools are covered in 10 chapters The references provided will be useful for further reading      Exergy Analysis for Energy Conversion Systems Efstathios Michaelides,2021-04-08 Discover a straightforward and holistic look at energy conversion and conservation processes using the exergy concept with this thorough text Explains the fundamental energy conversion processes in numerous diverse systems ranging from jet engines and nuclear reactors to human bodies Provides examples for applications to practical energy conversion processes and systems that use our naturally occurring energy resources such as fossil fuels solar energy wind geothermal and nuclear fuels With more than one hundred diverse cases and solved examples readers will be able to perform optimizations for a cleaner environment a sustainable energy future and affordable energy generation An essential tool for practicing scientists and engineers who work or do research in the area of energy and exergy as well as graduate students and faculty in chemical engineering mechanical engineering and physics      Manufacturing Zainul Huda,2018-05-11 This unique book is equally useful to both engineering degree students and production engineers practicing in industry The volume is designed to cover three aspects of manufacturing technology a fundamental concepts b engineering analysis mathematical modeling of manufacturing operations and c 250 problems and their solutions These attractive features render this book suitable for recommendation as a textbook for undergraduate as well as Master level programs in Mechanical Materials Industrial Engineering There are 19 chapters in the book each chapter first introduces readers to the technological importance of chapter topic and definitions of terms and their explanation and then the mathematical modeling engineering analysis of the corresponding manufacturing operation is presented The meanings of the terms along with their SI units in each mathematical model are clearly stated There are over 320 mathematical models equations The book is divided into three parts Part One introduces readers to manufacturing and basic manufacturing processes metal casting plastic molding metal forming ceramic processing composite processing heat treatment surface finishing welding joining and powder metallurgy and their engineering analysis mathematical modeling

followed by worked examples solved problem Part Two covers non traditional machining and computer aided manufacturing including their mathematical modeling and the related solved problems Finally quality control QC and economic aspects of manufacturing are discussed in Part Three Features Presents over 320 mathematical models and 250 worked examples Covers both conventional and non traditional manufacturing Includes design problems and their solutions on engineering manufacturing processes Special emphasis on casting design and weld design in manufacturing Offers computer aided manufacturing quality control and economics of manufacturing

*Rational Accidents* John Downer, 2024-01-16 An unflinching look at the unique challenges posed by complex technologies we cannot afford to let fail and why the remarkable achievements of civil aviation can help us understand those challenges Nuclear reactors deep sea drilling platforms deterrence infrastructures these are all complex and formidable technologies with the potential to fail catastrophically In *Rational Accidents* John Downer outlines a new perspective on technological failure arguing that undetectable errors can lurk in even the most rigorous and rational assessments of these systems due to the inherent limits of engineering tests and models Downer finds that it should be impossible from an epistemological viewpoint to achieve the near perfect reliability that we require of our most safety critical technologies There is however one such technology that demonstrably appears to achieve these impossible reliabilities jetliners Downer looks closely at civil aviation and how it has reckoned with the problem of failure He finds that the way we conceive of jetliner reliability hides the real practices by which it is achieved And he shows us why those practices are much less transferrable across technological domains than we are led to believe Fully understanding why jetliners don't crash he concludes should lead us to doubt the safety of other ultra reliable technologies A unique and sobering exploration of technological reliability from an STS perspective *Rational Accidents* is essential reading for understanding why our most safety critical technologies are even more dangerous than we believe

*Public Policy in the 'Asian Century'* Sara Bice, Avery Poole, Helen Sullivan, 2017-12-16 This volume explores the defining features critical approaches challenges and opportunities for public policy in the Asian Century This is the first book to systematically analyse the key institutions and practices that comprise public policy administration and governance to investigate how they are changing in the context of increasing Asian influence Its authors argue that the Asian Century holds the potential to generate a paradigm shift equivalent to the impacts of neo liberalism and the New Public Management of the late 20th century Divided into three parts this volume interrogates the theories underpinning contemporary public policy explores case studies from different policy arenas across the Asian region and imagines what a future of globalised public policy might look like It examines the implementation measures necessary to support policy and administration in an era of transnational governance networks tightly linked economic markets and progressively fluid cultural exchanges This book provides the concepts and tools necessary to navigate these shifting sands successfully It is essential reading for scholars of public policy public management international relations and politics and social sciences as well as for administrators and public servants

**Dynamics in Logistics** Michael Freitag, Aseem Kinra, Herbert Kotzab, Nicole Megow, 2022-05-04 Since 2007 the biennial International Conferences on Dynamics in Logistics LDIC offers researchers and practitioners from logistics operations research production industrial and electrical engineering as well as from computer science an opportunity to meet and to discuss the latest developments in this particular research domain From February 23th to 25th 2022 for the eighth time LDIC 2022 was held in Bremen Germany Similar to its seven predecessors the Bremen Research Cluster for Dynamics in Logistics LogDynamics organized this conference The spectrum of topics reaches from the dynamic modeling planning and control of processes over supply chain management and maritime logistics to innovative technologies and robotic applications for cyber physical production and logistics systems LDIC 2022 provided a forum for the discussion of advances in that matter The conference program consisted of keynote speeches and research papers selected by a severe double blind reviewing process Within these proceedings all the papers are published By this the proceedings give an interdisciplinary outline on the state of the art of dynamics in logistics as well as identify challenges and solutions for logistics today and tomorrow Colliery Engineer, 1908 **Engineering & Contracting**, 1921 **Springer Handbook of Automation** Shimon Y.
