Students Through Multilingual and Content Discourse is a peer reviewed research book that challenges the traditional monolingual classroom approach where the teacher's voice dominates and only the dominant culture's language is considered the path to success. The book aims to empower students by creating classroom spaces where all voices are heard, valued and empowered. It draws on research from scholars who study discourse and offers insights into how discourse can be used to promote language and literacy development, honor all students' voices and empower them. This book also provides guidance on culturally and linguistically sustaining discourse practices and encourages educators to incorporate students' home languages and discourse practices in classroom instruction. It challenges educators to move away from centering White English and represent language more responsibly within the classroom. This research is a valuable resource for academic scholars and a useful tool for teachers looking to cultivate student-centered classroom practices. By encouraging discourse among students, educators can create a space where human life holds meaning and students feel empowered to act and use their voices.

Researching and Teaching Reading Gabrielle Cliff Hodges, 2015-08-20

Many agree that engaging in research is what makes a teacher's professional development sustainable and *Researching and Teaching Reading* studies the ways in which research and teaching are entwined both within and beyond the classroom. Gabrielle Cliff Hodges encourages readers to deepen their understanding of reading through high quality teaching and research activities designed to engage young learners and generate rich research data in the expectation that teachers will wish to adapt or develop them further within their own contexts. The author explores how teachers' research and critical reading can further develop their understanding of their students' reading practices and argues that innovative approaches to teaching integrated with research enable English teachers to re-construct ideas and change how reading is taught. Key issues considered in this book include: Studying reading in terms of extending young people's ability to interpret and enjoy texts; The idea of reading as a social practice; The concept of culture in relation to reading; Why historical and spatial theoretical perspectives matter when researching and teaching reading.
