Frankenstein and STEAM Robin Hammerman, 2022-02-11. Charles E. Robinson, Professor Emeritus of English at The University of Delaware, definitively transformed study of the novel *Frankenstein* with his foundational volume *The Frankenstein Notebooks*, and in nineteenth-century studies more broadly brought heightened attention to the nuances of writing and editing *Frankenstein*. *STEAM* consolidates the generative legacy of his later work on the novel's broad relation to topics in science, technology, engineering, arts, and mathematics. *STEAM* has seven chapters written by leading and emerging scholars; pay homage to Robinson's later perspectives of the novel; and a concluding postscript contains remembrances by his colleagues and students. This volume not only makes explicit the question of what it means to be human, a question Robinson invited students and colleagues to examine throughout his career, but it also illustrates the depth of the field and diversity of those who have been inspired by Robinson's work. *Frankenstein and STEAM* offers direction for continuing scholarship on the intersections of literature, science, and technology. Published by the University of Delaware Press. Distributed worldwide by Rutgers University Press.

Frankenstein's Daughters Jane L. Donawerth, 1997-04-01. Women Science fiction authors past and present are united by the problems they face in attempting to write in this genre, an overwhelmingly male-dominated field. Science fiction has been defined by male-centered scientific discourse that describes women as alien others rather than rational beings. This perspective has defined the boundaries of science fiction, resulting in women writers being excluded as equal participants in the genre. *Frankenstein's Daughters* explores the different strategies women have used to negotiate the minefields of their chosen career; they have created a unique utopian science formulated by and for women, with women characters taking center stage and actively confronting oppressors. This type of depiction is a radical departure from the condition where women are relegated to marginal roles within the narratives. Donawerth takes a comprehensive look at the field and explores the works of authors such as Mary Shelley, Marion Zimmer Bradley, Ursula K. Le Guin, and Anne McCaffrey.
