Hydrology and Floodplain Analysis Philip B. Bedient, Wayne Charles Huber, Baxter E. Vieux, 2008 For undergraduate and graduate courses in Hydrology This text offers a clear and up to date presentation of fundamental concepts and design methods required to understand hydrology and floodplain analysis It addresses the computational emphasis of modern hydrology and provides a balanced approach to important applications in watershed analysis floodplain computation flood control urban hydrology stormwater design and computer modeling

Managing Climate Risk in Water Supply Systems Casey Brown, M. Neil Ward, 2013-02-15 Water resources systems provide multiple services and if managed properly can contribute significantly to social well being and economic growth However extreme or unexpected hydroclimatic conditions such as droughts and floods can adversely affect or even completely interrupt these services This manual seeks to provide knowledge resources and techniques for water resources professionals to manage the risks and opportunities arising from hydroclimatic variability and change Managing Climate Risk in Water Supply Systems provides materials and tools designed to empower technical professionals to better understand the key issues in water supply systems These materials are part of a suite of resources that are developed to share climate risk knowledge related to a range of sectors and climate related problems The text motivates students by providing practical exercises and it stimulates readers or workshop participants to consider options and analyses that highlight opportunities for better management in the water systems in which they are stakeholders Managing Climate Risk in Water Supply Systems provides a hands on approach to learning key concepts in hydrology and climate science as they relate to climate risk management in water supply systems The primary audience is technical professionals in water resources management and provides a practical approach to training Editors Casey Brown University of Massachusetts at Amherst MA USA and M Neil Ward Independent Consultant New Jersey USA

Engineering Hydrology of Arid and Semi-Arid Regions Mostafa M. Soliman, 2010-06-23 The natural scarcity of water in arid and semiarid regions aggravated by man made factors makes it difficult to achieve a reliable water resources supply Communities in these areas pay the price for thousands of years of water manipulation Presenting important insight into the complexities of arid region hydrology Engineering Hydrology of Arid
