 Jeep Technical Manual U. S. Army,2011-09-01 Designated as a light truck the Jeep was the primary four wheel drive vehicle
 for the U S Army during WWII The Jeep s design owed a great deal to Karl Probst a freelance designer employed by the
 American Bantam Car Co Probst s prototype Blitz Buggy was built in a mere 49 days It clearly impressed the Army in head to
 head competition against a design submitted by Willys Overland However the Buggy s engine failed to meet requirements
 and the Army determined that Bantam could not produce the vehicle in quantity As a result the Army bought the Bantam
 design and asked both Willys and Ford to improve it The Willys model MB equipped with a L134 straight 4 Go Devil engine
 was eventually accepted as the standard Ford models built to Willys specifications were designated GPW G for government
 vehicle P designating the 80 wheelbase and W indicating the Willys engine design Notably the GP part of the designation is
 often misinterpreted to mean General Purpose and some have suggested this is the reason the vehicle was nick named the
 Jeep In reality it was probably named after a character in the Popeye cartoons Roughly 640 000 Jeeps were built during
 WWII by Ford and Willys and used on every front Utilitarian rugged and easy to maintain Jeeps saw service as scout cars
 ambulances firefighting vehicles as tractors for artillery and more The vehicle so impressed war correspondent Ernie Pyle
 that he called it one of the two most important pieces of non combat equipment ever developed the other being the pocket
 stove Jeeps remained in service for the U S military in Korea and in the Vietnam War Created in 1944 this technical manual
 reveals a great deal about the Jeep s design and capabilities Intended as a manual for those charged with operation and
