Convergence and Hybrid Information Technology Geuk Lee, Daniel Howard, Dominik Ślęzak, 2011-09-14 This book constitutes the refereed proceedings of the 5th International Conference on Convergence and Hybrid Information Technology ICHIT 2011 held in Daejeon Korea in September 2011 The 85 revised full papers presented were carefully reviewed and selected from 144 submissions The papers are organized in topical sections on communications and networking motion video image processing security systems cloud RFID and robotics industrial application of software systems hardware and software engineering healthcare EEG and e learning HCI and data mining software system and its applications *Microwave Journal*

,2000 **Handbook of Convex Optimization Methods in Imaging Science** Vishal Monga, 2017-10-27 This book covers recent advances in image processing and imaging sciences from an optimization viewpoint especially convex optimization with the goal of designing tractable algorithms Throughout the handbook the authors introduce topics on the most key aspects of image acquisition and processing that are based on the formulation and solution of novel optimization problems The first part includes a review of the mathematical methods and foundations required and covers topics in image quality optimization and assessment The second part of the book discusses concepts in image formation and capture from color imaging to radar and multispectral imaging The third part focuses on sparsity constrained optimization in image processing and vision and includes inverse problems such as image restoration and de noising image classification and recognition and learning based problems pertinent to image understanding Throughout convex optimization techniques are shown to be a critically important mathematical tool for imaging science problems and applied extensively Convex Optimization Methods in Imaging Science is the first book of its kind and will appeal to undergraduate and graduate students industrial researchers and engineers and those generally interested in computational aspects of modern real world imaging and image processing problems

Nonlinear Distortion in Wireless Systems Khaled M. Gharaibeh, 2011-12-30 This book covers the principles of modeling and simulation of nonlinear distortion in wireless communication systems with MATLAB simulations and techniques In this book the author describes the principles of modeling and simulation of nonlinear distortion in single and multichannel wireless communication systems using both deterministic and stochastic signals Models and simulation methods of nonlinear amplifiers explain in detail how to analyze and evaluate the performance of data communication links under nonlinear amplification The book addresses the analysis of nonlinear systems with stochastic inputs and establishes the performance metrics of communication systems with regard to nonlinearity In addition the author also discusses the problem of how to embed models of distortion in system level simulators such as MATLAB and MATLAB Simulink and provides practical techniques that professionals can use on their own projects Finally the book explores simulation and programming issues and provides a comprehensive reference of simulation tools for nonlinearity in wireless communication systems Key Features Covers the theory models and simulation tools needed for understanding nonlinearity and nonlinear

distortion in wireless systems Presents simulation and modeling techniques for nonlinear distortion in wireless channels using MATLAB Uses random process theory to develop simulation tools for predicting nonlinear system performance with real world wireless communication signals Focuses on simulation examples of real world communication systems under nonlinearity Includes an accompanying website containing MATLAB code This book will be an invaluable reference for researchers RF engineers and communication system engineers working in the field Graduate students and professors undertaking related courses will also find the book of interest Pattern Recognition Huimin Lu, Michael Blumenstein, Sung-Bae Cho, Cheng-Lin Liu, Yasushi Yagi, Tohru Kamiya, 2023-11-04 This three volume set LNCS 14406 14408 constitutes the refereed proceedings of the 7th Asian Conference on Pattern Recognition ACPR 2023 held in Kitakyushu Japan in November 2023 The 93 full papers presented were carefully reviewed and selected from 164 submissions The conference focuses on four important areas of pattern recognition pattern recognition and machine learning computer vision and robot vision signal processing and media processing and interaction covering various technical aspects Pattern Recognition Shivakumara Palaiahnakote, Gabriella Sanniti di Baja, Liang Wang, Wei Qi Yan, 2020-02-22 This two volume set constitutes the proceedings of the 5th Asian Conference on ACPR 2019 held in Auckland New Zealand in November 2019 The 9 full papers presented in this volume were carefully reviewed and selected from 14 submissions They cover topics such as classification action and video and motion object detection and anomaly detection segmentation grouping and shape face and body and biometrics adversarial learning and networks computational photography learning theory and optimization applications medical and robotics computer vision and robot vision pattern recognition and machine learning multi media and signal processing and interaction *Conference Proceedings* ,2003 INIS Atomindex ,1995 **A Practical Guide to Error-control Coding Using Matlab** Yuan Jiang, 2010 This practical resource provides you with a comprehensive understanding of error control coding an essential and widely applied area in modern digital communications The goal of error control coding is to encode information in such a way that even if the channel or storage medium introduces errors the receiver can correct the errors and recover the original transmitted information This book includes the most useful modern and classic codes including block Reed Solomon convolutional turbo and LDPC codes You find clear guidance on code construction decoding algorithms and error correcting performances Moreover this unique book introduces computer simulations integrally to help you master key concepts Including a companion DVD with MATLAB programs and supported with over 540 equations this hands on reference provides you with an in depth treatment of a wide range of practical implementation issues *MATLAB® by Example* Munther Gdeisat, Francis Lilley, 2012-12-31 MATLAB By Example guides the reader through each step of writing MATLAB programs The book assumes no previous programming experience on the part of the reader and uses multiple examples in clear language to introduce concepts and practical tools Straightforward and detailed instructions allow beginners to learn and develop their MATLAB skills quickly The book consists of ten chapters

discussing in detail the integrated development environment IDE scalars vectors arrays adopting structured programming style using functions and recursive functions control flow debugging profiling and structures A chapter also describes Symbolic Math Toolbox teaching readers how to solve algebraic equations differentiation integration differential equations and Laplace and Fourier transforms Containing hundreds of examples illustrated using screen shots hundreds of exercises and three projects this book can be used to complement coursework or as a self study book and can be used as a textbook in universities colleges and high schools No programming experience necessary to learn MATLAB Examples with screenshots and plentiful exercises throughout help make MATLAB easy to understand Projects enable readers to write long MATLAB programs and take the first step toward being a professional MATLAB programmer
