Manual of Examinations for the ..., 1914 **Methodologies and Intelligent Systems for Technology Enhanced**

Learning, 9th International Conference, Workshops Elvira Popescu, Ana Belén Gil, Loreto Lancia, Luigia Simona

Sica, Anna Mavroudi, 2019-06-24 This book is based on the 9th International Conference in Methodologies and Intelligent Systems for Technology Enhanced Learning which was hosted by the University of Salamanca and held in Vila Real, Spain from 26th to 28th June 2019. Expanding on the topics of the evidence-based TEL workshops series, it provides an open forum for discussing intelligent technologies for learning. In particular, it discusses recommendation mechanisms that enable us to tailor learning to different contexts and people, e.g., by considering their personality and learning analytics that help augment learning opportunities, e.g., by supporting the adaptation of the learning material. In addition to technologies, it covers methods from different fields such as educational psychology or medicine and from diverse communities co-working with people such as making communities and participatory design communities to help create novel TEL opportunities. Further, it describes the use of methods and technologies to investigate and enhance learning for fragile users like children, the elderly, and those with special needs. We thank the sponsors IEEE Systems, Man, and Cybernetics Society Spain Section Chapter and the IEEE Spain Section Technical Co-Sponsor IBM, Indra, Viewnext, Global Exchange, AEPIA, APPIA, and AIR Institute. **Resources in**

Leveraging Technology to Improve School Safety and Student Wellbeing Huffman, Stephanie P., Loyless, Stacey, Albritton, Shelly, Green, Charlotte, 2019-10-25 From implementation in the classroom to building security, technology has permeated all aspects of education throughout the United States. Though hardware has been developed to identify and prevent weaponry from entering a school, including video cameras, entry control devices, and weapon detectors, school safety remains a fundamental concern with the recent increase of school violence and emergence of cyberbullying. Professionals need answers on how to use this technology to protect the physical, emotional, and social wellbeing of all children. Leveraging Technology to Improve School Safety and Student Wellbeing is a pivotal reference source that provides vital research on the application of technology in P-12 school safety and its use to foster an environment where students can feel safe and be academically successful. The book will comprise empirical, conceptual, and practical applications that craft an overall understanding of the issues in creating a safe learning environment and the role technology can and should play where a student's wellbeing is valued and protected from external and internal entities. Equitable access is treasured as a means for facilitating the growth of the whole student, and policy practices and procedures are implemented to build a foundation to transform the culture and climate of the school into an inclusive, nurturing environment. While highlighting topics such as professional development, digital citizenship, and community infrastructure, this publication is ideally designed for educators, scholars, leadership,
