Joseph E. Donlan, 2021-06-06 Many people believe in the power of positive thinking i.e. how thoughts and attitude can shape their future yet despite a plethora of books on this subject no previous author has credibly explained how mere thoughts are able to tangibly influence future events To explain the connection Dr Donlan presents a new paradigm of nature coupled with a viable explanation of how our right cerebral hemisphere has evolved circuitry that can tap into the hidden domain of the metaphysical To support this premise he exposes the reader to the worlds of physics metaphysics brain architecture and evolution Donlan then introduces the many problems associated with the current model and contrasts it with a new view which remedies many of the issues facing theoretical physicists today Important to its central theme the book's proposed paradigm supports the remarkable notion that the future can only be created with thoughts In the final analysis the author brings his readers through the necessary steps to put this knowledge to work to help them pre-ordain their own realities
