Snyder,2011-08-18 Cancer touches the lives of millions worldwide each year This is reflected not only in well publicized mortality statistics but also in the profound though much more difficult to measure effects of cancer on the health related quality of life economic status and overall well being of patients and their families In 2001 the US National Cancer Institute established the Cancer Outcomes Measurement Working Group to evaluate the state of the science in measuring the important and diverse impacts of this disease on individuals and populations The findings and recommendations of the

working group s 35 internationally recognized members are reported in Outcomes Assessment in Cancer lucidly written and accessible to both researchers and policy makers in academia government and industry Originally published in 2005 this volume provides a penetrating yet practical discussion of alternative approaches for comprehensively measuring the burden of cancer and the effectiveness of preventive and therapeutic interventions
