

Model VM88

Eight Channel Digital Mixer with DSP Effects

Introduction

Thank you very much for purchasing the Fostex VM88. Please read the following to get the most satisfaction from your purchase, and to learn important information about safety precautions when using Fostex products.

The VM88 digital mixer does all internal signal processing digitally. The input features 8 analog channels, of which 4 channels (XLR or PHONE) are for microphones; digital inputs (S/P DIF or ADAT) via optical connection are provided. For outputs, an optical digital output (S/P DIF or ADAT) in addition to stereo out (balanced/unbalanced), headphone out, AUX send/out and monitor outs in analog are also provided. An insert function is featured in channels 1 - 4 for more flexibility during mixing.

In addition to each input channel, an three band EQ is also provided for the master output. The VM88 also incorporates high performance DSP multi-effects on two channels that operate by A.S.P. (Fostex Advanced Signal Processing Technology*) exclusively developed by Fostex. This allows a wide range of equalizing and effects processing. All settings, including mix and effects settings, are stored in scene memory, and a desired scene memory can be recalled instantaneously. Although small and lightweight, the VM88 is a high performance unit. Please read this manual carefully before operation to understand all functions of the VM88.

* See page 24 for more details on the A.S.P. (Fostex Advanced Signal Processing Technology).
