Acoustical Imaging Michael Halliwell, Peter N.T. Wells, 2006-05-26 The origin of the International Acoustical Imaging Symposium series can be traced to 1967 when a meeting on acoustical holography was held in California In those days acoustical holography was at the leading edge of research but as the importance of this subject waned so the title of the series was changed from Acoustical Holography to Acoustical Imaging in 1978 The early Symposia were held at various venues in the United States In 1980 the series became international with the Symposium that year taking place in Cannes in France The pattern now is to try to meet alternately in the USA and in another part of the world so that active researchers everywhere can conveniently attend at a reasonably high frequency It was a great privilege for us in Bristol in the United Kingdom to be chosen to host the 25th Symposium which convened on 19 March 2000 and spread over four days We were blessed not only by good weather but also by the attendance of nearly 100 participants who came from 17 countries A large number of papers were accepted for presentation either orally or as posters Whether an oral presentation or a poster all were considered to have equal merit and no distinction is made between them in the published proceedings There were no parallel sessions so every participant could attend every presentation The resultant disciplinary cross fertilisation maintained the tradition of past Symposia **Deep-Sea Sampling Technology** Jiawang Chen, Yuan Lin, Zhilei Sun, Nhan Phan-Thien, 2023-06-27 **New Remedies** Frederick Albert Castle, Charles Rice, 1882 An illustrated monthly trade journal of materia medica pharmacy and therapeutics varies *InfoWorld* , 2003-01-20 InfoWorld is targeted to Senior IT professionals

River Flow 2020 Wim Uijttewaal,Mário J. Franca,Daniel Valero,Victor Chavarrias,Clàudia Ylla Arbós,Ralph Schielen,Alessandra Crosato,2020-08-27 Rivers form one of the lifelines in our society by providing essential services such as availability of fresh water navigation energy ecosystem services and flood conveyance Because of this essential role mankind has interfered continuously in order to benefit most and at the same time avoid adverse consequences such as flood risk and droughts This has resulted in often highly engineered rivers with a narrow set of functions In the last decades rivers are increasingly considered in a more holistic manner as a system with a multitude of interdependent processes River research and engineering has therefore added to the river fundamentals also themes like ecohydraulics consequences of climate change and urbanisation River Flow 2020 contains the contributions presented at the 10th conference on Fluvial Hydraulics River Flow 2020 organised under the auspices of the Committee on Fluvial Hydraulics of the International Association for Hydro Environment Engineering and Research IAHR What should have been a lively physical gathering of researchers students and practitioners was converted into an online event as the COVID 19 pandemic hindered international travelling

and large gatherings of people Nevertheless the fluvial hydraulics community showed their interest and to be very much alive with a high number of participations for such event Since its first edition in 2002 in Louvain la Neuve this series of conferences has found a large and loyal audience in the river research and engineering community while being also attractive to the new researchers and young professionals This is highlighted by the large number of contributions applying for the Coleman award for young researchers and also by the number of applications and attendants to the Master Classes which are aimed at young researchers and students River Flow 2020 aims to provide an updated overview of the ongoing research in this wide range of topics and contains five major themes which are focus of research in the fluvial environment river fundamentals the digital river the healthy river extreme events and rivers under pressure Other highlights of River Flow 2020 include the substantial number of interdisciplinary subthemes and sessions of special interest The contributions will therefore be of interest to academics in hydraulics hydrology and environmental engineering as well as practitioners that would like to be updated about the newest findings and hot themes in river research and engineering
