## Fraction Problem Solving

**Directions:** Solve the fraction problems below. Use objects, act it out, draw a picture, or write an equation for each problem.

Mrs. Medeiros, our teacher, just bought a box of 150 crayons! She asked Shandra and me to split the pack into fifths, and place the them in buckets on each table. How many crayons were put into each bucket?

George and Tricia took 93 photographs of the fundraiser for the school. When it was over, one third of the pictures were framed and hung around the city. How many pictures were not framed?

Leif and Cru were playing with their new blocks. One fourth of the blocks were blue,  $\frac{1}{4}$  were green, another fourth were yellow, and the last 10 were red. How many blocks were there altogether?

Jess and Mark hiked the 2,200 mile appalachian trail last summer. Half of the trail was hiked wearing shorts and t-shirts. The other half was hiked wearing long pants and sweatshirts. How many miles did they hike in shorts?

In the 30 days of this past September,  $\frac{1}{6}$  of the days were at or above 80°F. How many days were below 80°F?

**Visible Learning for Mathematics, Grades K-12** John Hattie, Douglas Fisher, Nancy Frey, Linda M. Gojak, Sara Delano Moore, William Mellman, 2016-09-15 Selected as the Michigan Council of Teachers of Mathematics winter book club book Rich tasks collaborative work number talks problem based learning direct instruction with so many possible approaches how do we know which ones work the best In Visible Learning for Mathematics six acclaimed educators assert it's not about which one it's about when and show you how to design high impact instruction so all students demonstrate more than a year's worth of mathematics learning for a year spent in school That's a high bar but with the amazing K-12 framework here you choose the right approach at the right time depending upon where learners are within three phases of learning surface deep and transfer This results in visible learning because the effect is tangible The framework is forged out of current research in mathematics combined with John Hattie's synthesis of more than 15 years of education research involving 300 million students Chapter by chapter and equipped with video clips planning tools rubrics and templates you get the inside track on which instructional strategies to use at each phase of the learning cycle Surface learning phase When through carefully

constructed experiences students explore new concepts and make connections to procedural skills and vocabulary that give shape to developing conceptual understandings Deep learning phase When through the solving of rich high cognitive tasks and rigorous discussion students make connections among conceptual ideas form mathematical generalizations and apply and practice procedural skills with fluency Transfer phase When students can independently think through more complex mathematics and can plan investigate and elaborate as they apply what they know to new mathematical situations To equip students for higher level mathematics learning we have to be clear about where students are where they need to go and what it looks like when they get there Visible Learning for Math brings about powerful precision teaching for K 12 through intentionally designed guided collaborative and independent learning
