Harperism Donald Gutstein, 2014-09-03 Margaret Thatcher transformed British political life forever So did Ronald Reagan in the United States Now Canada has experienced a similar dramatic shift to a new kind of politics which author Donald Gutstein terms Harperism Among its key tenets A weakened labour movement and preferably

the disappearance of unions will contribute to Canada's economic prosperity Cutting back government scientific research and data collection will improve public policy making Eliminating First Nations reserves by converting them to private property will improve conditions of life for aboriginal peoples Inequality of incomes and wealth is a good thing and Canada needs more of it These and other essential elements of Harperism flow from neo liberal economic theories propounded by the Austrian economist Friedrich von Hayek and his U S disciples They inspired Thatcherism and Reaganism Stephen Harper has taken this neo liberalism much further in many key areas As Donald Gutstein shows Harper has successfully used a strategy of incremental change coupled with denial of the underlying neo liberal analysis that explains these hard to understand measures The success of Harperism is no accident Donald Gutstein documents the links between the politicians think tanks journalists academics and researchers who nurture and promote each other's neo liberal ideas They do so using funds provided by ultra rich U S donors by Canadian billionaires like Peter Munk and by many big corporations all of whom stand to gain from the ideas and policies the Harperites develop and push This book casts new light on the last ten years of Canadian politics It documents the challenges that Harperism with or without Stephen Harper will continue to offer to the many Canadians who do not share this pro market world view *Handbook of Cultural Studies and Education* Peter Pericles Trifonas, Susan Jagger, 2018-11-15 The Handbook of Cultural Studies in Education brings together interdisciplinary voices to ask critical questions about the meanings of diverse forms of cultural studies and the ways in which it can enrich both education scholarship and practice Examining multiple forms mechanisms and actors of resistance in cultural studies it seeks to bridge the gap between theory and practice by examining the theme of resistance in multiple fields and contested spaces from a holistic multi dimensional perspective converging insights from leading scholars practitioners and community activists Particular focus is paid to the practical role and impact of these converging fields in challenging rupturing subverting and changing the dominant socio economic political and cultural forces that work to maintain injustice and inequity in various educational contexts With contributions from international scholars this handbook serves as a key transdisciplinary resource for scholars and students interested in how and in what forms Cultural Studies can be applied to education *The Cult of Efficiency* Janice Gross Stein, 2002 This thought provoking discourse on the unquestioned pursuit of efficiency reveals how the discussion of efficiency in the delivery of public goods such as education and health care has risen to prominence in postindustrial society Stein's provocative argument reminiscent of the thinking of Lewis Mumford demonstrates that efficiency can too often be a cloak for political agendas and that pressure for efficiency can actually be a detrimental rather than a positive force Citizens in public schools community clinics and hospitals are shown engaging directly with such agendas redrawing the face of the state as they impose new ways of delivering public goods Stein demonstrates how they are calling not only for efficiency but for accountability and choice as they confront the dilemmas of democratic processes in a global age **Sanathana Sarathi English Volume 05 (2000 to 2010)** Sri Sathya Sai Media Centre, 2022-11-11 Started in

Schools Grant Frost,2020-04-07 Nova Scotia s public schools and their students have faced dramatic conflict and drastic change over the past 25 years While critics charge that schools are failing kids teachers have been under attack from think tanks and politicians Parents and citizens have seen power centralized after democratically elected school boards were abolished Grant Frost offers an insider s account of these tumultuous years and offers an explanation for the turmoil Behind the conflict he discovers right wing think tanks that relentlessly seek to discredit public education and teachers while pushing for changes that would benefit corporations who want willing workers The think tanks are also promoters of the charter school movement that continues to gain ground in the US and that is promoted as a better option than public schools Whether it s Nova Scotia s own right wing think tank or local journalists who readily adopt the cry that our schools are failing Grant Frost traces the path that he finds has threatened the quality of schooling in Nova Scotia He sets out the steps for

parents teachers and other citizens to ensure that public education is championed and protected in Nova Scotia

Globalizing Educational Accountabilities Bob Lingard, Wayne Martino, Goli Rezai-Rashti, Sam Sellar, 2015-07-30

Globalizing Educational Accountabilities analyzes the influence that international and national testing and accountability regimes have on educational policy reform efforts in schooling systems around the world Tracing the evolution of those regimes with an emphasis on the OECD's PISA it reveals the multiple effects of policy as numbers in countries with different types of government and different education systems From the effect of Shanghai's PISA success on nations trying to compete economically to the perverse effects of linking funding to performance targets in Australia the analysis links testing and accountability to new modes of network governance new spatialities and the significance of data infrastructures This highly illustrative text offers scholars and policy makers a critical policy sociology framework for doing education policy analysis today

Between Caring & Counting Lindsay Kerr, 2006-12-15 One of the key planks of conservative Ontario premier Mike Harris's 1990s platform was education reform Amid a sea of official reports policy documents and expert opinions on education however the voices of actual classroom teachers were difficult to find This omission is redressed in Lindsay Kerr's Between Caring Counting Through a focus group of present day secondary school teachers in Toronto Kerr delivers a passionate account of the unassailably negative changes affecting secondary education and teachers work From a critical feminist perspective and using institutional ethnography Kerr situates the problem in education squarely as a conflict between an accounting logic and an ethic of care at the centre of education practice She exposes paradoxes inherent in education reform such as the increase of government control at the same time that government funding for education decreases She also connects educational restructuring to changes in the power relations of gender class and race across the public education system These local changes she finds do not reflect sound pedagogy but the imperatives of neoliberal globalization Counteracting despair with hope Kerr explores self reflexive suggestions for teacher educators to exercise agency in their lives and to continue to work toward a just and equitable public education system

High-Stakes Testing in Education Theo J.H.M Eggen, Gordon Stobart, 2015-10-14 High stakes educational testing is a global phenomenon which is increasing in both scale and importance Assessments are high stakes when there are serious consequences for one or more stakeholders Historically tests have largely been used for selection or for providing a licence to practise making them high stakes for the test takers Testing is now also used for the purposes of improving standards of teaching and learning and of holding schools accountable for their students results These tests then become high stakes for teachers and schools especially when they have to meet externally imposed targets More recent has been the emergence of international comparative testing which has become high stakes for governments and policy makers as their education systems are judged in relation to the performances of other countries In this book we draw on research which examines each of these uses of high stakes testing The articles evaluate the impact of such assessments and explore the issues of value and fairness which

they raise To underline the international appeal of high stakes testing the studies are drawn from Australia Africa the Caribbean Europe former Soviet republics and North America Collectively they illustrate the power of high stakes assessment in shaping for better or for worse policy making and schooling This book was originally published as a special issue of Assessment in Education Principles Policy Practice Rethinking the Welfare State Ronald Joel Daniels, M. J. Trebilcock, 2005 This book offers a comprehensive and comparative analysis of social welfare policy and explores the effectiveness of the voucher system in an international context
