Engaging Students with Music Education Pete Dale,2017-03-27 Engaging Students with Music Education is a groundbreaking book about using DJ decks and urban music in mainstream schools to re engage disaffected learners and develop a curriculum which better reflects overall contemporary tastes Many young learners are at risk of

exclusion this book argues that for such individuals the implications of such a shift in the music curriculum could be especially positive Drawing extensively on the author's own wealth of teaching experience and bridging the gap between practice and theory this book demonstrates through case studies that DJ decks can prove extremely valuable in mainstream classroom situations across the secondary school age ranges Addressing challenging and crucial topics combining rigorous theoretical analysis with practical suggestions the book addresses questions such as Are DJ decks actually a musical instrument and are they suitable for classroom teaching Will Ofsted's school inspectors approve of music teaching involving DJ decks and urban music If we bring urban music into the classroom will this further marginalise classical music Are DJing and MCing skills recognised within examination specifications at least in the UK Current teachers will find the practical advice on how to incorporate DJ decks and urban music into their classroom especially helpful whilst educational researchers will be captivated by the critical discussion of the child centred tradition and a theoretical approach which stretches from continental philosophy to practice based reflection With an insistence that the starting point for music education should always be the interests and experiences of the learners this book is essential reading for those music teachers and researchers interested in the benefits of non standard music making in the classroom

Everything for Sale? The Marketisation of UK Higher Education Roger Brown, Helen Carasso, 2013-02-11 The marketisation of higher education is a growing worldwide trend Increasingly market steering is replacing or supplementing government steering Tuition fees are being introduced or increased usually at the expense of state grants to institutions Grants for student support are being replaced or supplemented by loans Commercial rankings and league tables to guide student choice are proliferating with institutions devoting increasing resources to marketing branding and customer service The UK is a particularly good example of this not only because it is a country where marketisation has arguably proceeded furthest but also because of the variations that exist as Scotland Wales and Northern Ireland increasingly diverge from England In Everything for Sale Roger Brown argues that the competitive regime that is now applicable to our Higher Education system was the logical and possibly inevitable outcome of a process that began with the introduction of full cost fees for overseas students in 1980 Through chapters including Markets and Non Markets The Institutional Pattern of Provision The Funding of Research The Funding of Student Education Quality Assurance The Impact of Marketisation Efficiency diversity and equity He shows how the evaluation and funding of research the funding of student education quality assurance and the structure of the system have increasingly been organised on market or quasi market lines As well as helping to explain the evolution of British higher education over the past thirty years the book contains some

important messages about the consequences of introducing or extending market competition in universities core activities of teaching and research This timely and comprehensive book is essential reading for all academics at University level and anyone involved in Higher Education policy , Music Education Yearbook ,2003 **The Power of Assessment for Learning** Margaret Heritage,Christine Harrison,2019-11-15 The future of Assessment for Learning 20 years after Inside the Black Box Twenty years after the publication of Inside the Black Box the landmark review of formative classroom assessment international education experts Christine Harrison and Margaret Heritage tackle assessment for learning AfL anew with fresh insights gained from two decades of research theory and classroom practice The Power of Assessment for Learning Twenty Years of Research and Practice in UK US Classrooms examines the practices and processes of formative assessment over time in both countries evaluates the benefits accrued to teaching and learning and considers future developments in growing and sustaining AfL practice It features Key AfL ideas approaches and supports Vignettes of classroom practice that illustrate AfL in action in the U K and U S Practice based evidence to enrich understanding of AfL from both the teacher s and the student s perspective Focused on student centeredness and rich with classroom examples this book is a sounding board for educators to explore and reflect on their own AfL practices and beliefs
