Arithmetic Counts! Paul Shoecraft, 2025-01-24 Dr Shoecraft may be the only mathematician since the New Math in the 1960s to seriously analyze the lowly subject of arithmetic and how to teach it His breakthrough came when he experimented with teaching what needs to be understood instead of known memorized like teaching why addition problems until the algorithm they are using supposedly becomes cemented in their brains By teaching the essence of arithmetic in sensible ways and appealing to children's love of games songs and movement he's proven that virtually ALL children can learn arithmetic the foundation of algebra higher mathematics science technology and more even music When children understand arithmetic they own it It's no longer just their teacher's math It's their math America's children are being held back in math because of how arithmetic is drug out in elementary school Virtually every textbook based elementary school math program in use today is mind numbing in its repetitiveness from grade to grade The reason for the redundancy is to slow down the teaching of arithmetic so it can be memorized Research shows that the human brain is not designed to remember things learned by rote when no longer practiced That's acknowledged in the use it or lose it aphorism that states the obvious that we remember what we use and forget what we don't You know that to be true if you've ever forgotten things you once knew as well as your own name things like an old address or a license plate number Every child can understand base ten numeration when taught hands on with arithmetic blocks Thereby every child can understand base ten arithmetic And every child can learn how to count out the number facts like $5 \times 7 = 12$ $17 \times 8 = 96$ $X \times 7 = 42$ and $56 \times 7 = 8$ and if they forget one never have to guess and risk ridicule and bad grades if they guess wrong What matters in teaching arithmetic is not how much a child can remember but how much they can figure out if when they forget

[It's OK to Go Up the Slide](#) Heather Shumaker, 2016-03-08 When it comes to parenting sometimes you have to trust your gut With her first book *It's OK Not to Share* Heather Shumaker overturned all the

conventional rules of parenting with her renegade rules for raising competent and compassionate kids In It s Ok To Go Up the Slide Shumaker takes on new hot button issues with renegade rules such as Recess Is A Right It s Ok Not To Kiss Grandma Ban Homework in Elementary School Safety Second Don t Force Participation Shumaker also offers broader guidance on how parents can control their own fears and move from an overscheduled life to one of more free play Parenting can too often be reduced to shuttling kids between enrichment classes but Shumaker challenges parents to reevaluate how they re spending their precious family time This book helps parents help their kids develop important life skills in an age appropriate way Most important parents must model these skills whether it s technology use confronting conflict or coping emotionally with setbacks Sometimes being a good parent means breaking all the rules **A Guide to Private Schools** Ann Dolin,2013-10-31 EVERYTHING YOU NEED TO KNOW ABOUT DC AREA PRIVATE SCHOOLS A guide to the private school admission process The pros and cons of public and private schools How many schools to apply to and when to begin the application How to find the right match for your childs unique learning style Anns rules for bettering your chances of acceptance 94 profiles on DC Area private schools **The Teacher's Awesome App Guide 1.5** John F. OSullivan,2014-10-25 **Design in Five** Nicole Dimich,2014-09-11 Fully engage learners in your classroom Discover how to create high quality assessments using a five phase design protocol Explore types and traits of quality assessment and learn how to develop assessments that are innovative effective and engaging Evaluate whether your current assessments meet the design criteria and discover how to use this process collaboratively with your team **Christian Home Educators' Curriculum Manual** Cathy Duffy,1995 The premiere guide for choosing homeschool curriculum For beginners or veterans Cathy helps you wade through the curriculum jungle to choose what s right for each of your children Reviews of hundreds of books games videos computer programs parent helps and much much more for all subjects Learning styles Cathy helps you determine each child s learning style then choose methods and resources that fit each child What your child needs to know what is typically taught at each grade level Which resources allow your children to work independently which work best taught one on one Identifying and dealing with learning disabilities plus a list of consultants for extra help Testing the good and bad of testing different kinds of tests where to get them testing services Addresses phone numbers faxes e mail and web sites for all publishers and distributors How to consolidate your shopping and save shipping costs

Unveiling the Magic of Words: A Review of "**Go Math Teacher Edition Kindergarten**"

In some sort of defined by information and interconnectivity, the enchanting power of words has acquired unparalleled significance. Their ability to kindle emotions, provoke contemplation, and ignite transformative change is truly awe-inspiring. Enter the realm of "**Go Math Teacher Edition Kindergarten**," a mesmerizing literary masterpiece penned with a distinguished author, guiding readers on a profound journey to unravel the secrets and potential hidden within every word. In this critique, we shall delve to the book is central themes, examine its distinctive writing style, and assess its profound affect the souls of its readers.
