Moral Codes and Social Structure in Ancient Greece Joseph M. Bryant, 1996-01-01 An exercise in cultural sociology. Moral Codes and Social Structure in Ancient Greece seeks to explicate the dynamic currents of classical Hellenic ethics and social philosophy by situating those idea complexes in their socio historical and intellectual contexts. Central to this enterprise is a comprehensive historical sociological analysis of the Polis form of social organization which charts the evolution of its basic institutions, roles, statuses and class relations. From the Dark Age period of genesis on to the Hellenistic era of eclipse by the emergent forces of imperial patrimonialism, Polis society promoted and sustained corresponding normative codes which mobilized and channeled the requisite emotive commitments and cognitive judgments for functional proficiency under existing conditions of life. The aristocratic warrior ethos canonized in the Homeric epics, the civic ideology of equality and justice espoused by reformist lawgivers and poets, the democratization of status, honor and martial virtue that attended the shift to hoplite warfare, the philosophical exaltation of the Polis citizen bond as found in the architectonic visions of Plato and Aristotle and the subsequent retreat from civic virtues and the interiorization of value articulated by the Skeptics, Epicureans and Stoics, new age philosophies in a world remade by Alexander's conquests, these are the key phases in the

evolving currents of Hellenic moral discourse as structurally framed by transformations within the institutional matrix of Polis society
