Toni Morrison and the Natural World Anissa Janine Wardi, 2021-06-28 Winner of the Toni Morrison Society Book Prize for Best Single Authored Book 2019 2022 Critics have routinely excluded African American literature from ecocritical inquiry despite the fact that the literary tradition has from its inception proved to be steeped in environmental concerns that address elements of the natural world and relate nature to the transatlantic slave trade plantation labor and nationhood Toni Morrison s work is no exception Toni Morrison and the Natural World An Ecology of Color is the first full length ecocritical investigation of the Nobel Laureate s novels and brings to the fore an unequaled engagement between race and nature Morrison s ecological consciousness holds that human geographies are enmeshed with nonhuman nature It follows then that ecology the branch of biology that studies how people relate to each other and their environment is an apt framework for this book The interrelationships and interactions between individuals and community and between organisms and the biosphere are central to this analysis They highlight that the human and nonhuman are part of a larger ecosystem of interfacings and transformations Toni Morrison and the Natural World is organized by color examining soil brown in *The Bluest Eye* and *Paradise* plant life green in *Song of Solomon* *Beloved* and *Home* bodies of water blue in *Tar Baby* and *Love* and fire orange in *Sula* and *God Help the Child* By providing a racially inflected reading of nature Toni Morrison and the Natural World makes an important contribution to the field of environmental studies and provides a landmark for Morrison scholarship
