Teacher's Guide to Using the Next Generation Science Standards With Gifted and Advanced Learners Cheryll M. Adams, Alicia Cotabish, Debbie Dailey, 2021-09-23 A Teacher's Guide to Using the Next Generation Science Standards With Gifted and Advanced Learners provides teachers and administrators with practical examples of ways to build comprehensive coherent and rigorous science learning experiences for gifted and advanced students from kindergarten to high school. It provides an array of examples across the four domains of science: physical sciences, Earth and space sciences, life sciences, and engineering technology and applications of science. Each learning experience indicates the performance expectation addressed and includes a sequence of activities, implementation examples, connections to the CCSS Math and CCSS ELA, and formative assessments. Chapters on specific instructional and management strategies, assessment, and professional development suggestions for implementing the standards within the classroom will be helpful for both teachers and administrators.

Learning

That Sticks Bryan Goodwin, Tonia Gibson, Kristin Rouleau, 2020-06-05 In far too many classrooms the emphasis is on instructional strategies that teachers employ rather than on what students should be doing or thinking about as part of their learning. What's more, students' minds are something of a mysterious black box for most teachers, so when learning breaks down, they're not sure what went wrong or what to do differently to help students learn. It doesn't have to be this way. Learning That Sticks helps you look inside that black box. Bryan Goodwin and his coauthors unpack the cognitive science underlying research-supported learning strategies so you can sequence them into experiences that challenge, inspire, and engage your students. As a result, you'll learn to teach with more intentionality, understanding not just what to do but also when and why to do it. By way of an easy-to-use six-phase model of learning, this book analyzes how the brain reacts to, stores, and retrieves new information. Helps you zoom out to understand the process of learning from beginning to end. Helps you zoom in to see what's going on in students' minds during each phase. Learning may be complicated, but learning about learning doesn't have to be. And to that end, Learning That Sticks helps shine a light into all the black boxes in your classroom and make your practice the most powerful it can be. This product is a copublication of ASCD and McREL.

Engineering Instruction for High-Ability Learners in K-8 Classrooms National Assoc For Gifted Children, Alicia Cotabish, 2021-09-03 Engineering Instruction for High Ability Learners in K-8 Classrooms is an application-based practitioners guide to applied engineering that is grounded in engineering practices found in the new Next Generation Science Standards (NGSS) and the Standards for Engineering Education. The book provides educators with information and examples on integrating engineering into existing and newly designed curriculum. The book specifies necessary components of engineering curriculum and instruction, recommends appropriate activities to encourage problem solving, creativity, and innovation, and provides examples of innovative technology in engineering curriculum and instruction. Additionally, authors discuss professional development practices to best prepare teachers for engineering instruction and provide recommendations to identify engineering talent among K-8 students. Finally, the book includes a wealth of resources including sample lesson and assessment plans to assist educators in integrating engineering into their curriculum and instruction.

The Comprehensive Guide to Apologetics Joseph M. Holden, 2022-01-11 A must-read for anyone who seeks to share the gospel and defend the faith. Josh McDowell: Crucial to the next generation of missionaries and apologetic evangelists. Norman L. Geisler: In a postmodern, post-truth society, how can we be certain our faith is based on more than our feelings? And how do we answer the complex questions about Christianity posed by skeptics and searchers alike? The Comprehensive Guide to Apologetics challenges you to understand and defend the tenets of your faith. This informative resource covers topics spanning from the evidence for the Bible's reliability to the relationship between science and faith to the comparisons between Christianity and other worldviews. The many contributors to this volume include respected apologists and Bible scholars such as Norman L. Geisler, Josh McDowell, Gary R. Habermas, Walter C. Kaiser Jr., Ron Rhodes, Edwin M. Yamauchi, John Warwick Montgomery, William A.

Giving Space to African Voices Zehlia Babaci-Wilhite,2014-08-07 This book sets out to bring voices of the South to the debate on localization of education and makes the case that it should be considered a right in education Despite all the scientifically based evidence on the improved quality of education through the use of a local language and local knowledge English as a language of instruction and Western knowledge based curriculum continue to be used at all educational levels in many developing nations This means that in many African countries the goal of rights to education is becoming increasingly remote let alone that of rights in education With this understanding and with the awareness of the education challenges of millions of children throughout Africa the authors argue that local curriculum through local languages needs to be valued and to be preserved and that children need to be prepared for the world in a language that promotes understanding The authors make a clear case that policy makers are in a position to work towards a quality education for all as part of a more comprehensive right based approach We owe it to the children of the South to offer

the best quality education possible in order to achieve social justice
