Supreme Court, 1928 **The Wireless Age**, 1917 **The Language of Smell** Robert Burton, 2025-04-01 The sense of smell is at least equally important to many animals as sight and hearing This important fact had previously been largely overlooked and is the subject of this fascinating study of the animal kingdom The Language of Smell originally published in 1976 Robert Burton a zoologist and writer on wildlife surveys the use of the sense of smell from ants and butterflies through birds to whales and other mammals and to human beings themselves He describes the organs of smell and discusses the

theories as to the way that odours are converted into nerve impulses He considers the recent scientific advances in the field including the observations on wild animals and laboratory experiments which show how smell is used for finding food repelling enemies and for navigation Many animals also use smell for communication They produce special odours called pheromones that act as signals to members of their own species Robert Burton shows how pheromones play a particularly important part in the social and sexual lives of insects and mammals and that human beings also make more use of their sense of smell than had been thought Throughout the book illustrations and line drawings are used to clarify the descriptions of the vital and exciting language of smell
