Humankind and Humanity in the Philosophy of the Enlightenment Stefanie Buchenau, Ansgar Lyssy, 2023-08-24 What makes us human beings Is it merely some corporeal aspect or rather some specific mental capacity language or some form of moral agency or social life Is there a gendered bias within the concept of humanity How do human beings become more human and can we somehow cease to be human This volume provides some answers to

these fundamental questions and more by charting the increased preoccupation of the European Enlightenment with the concepts of humankind and humanity Chapters investigate the philosophical concerns of major figures across Western Europe including Montesquieu Diderot Rousseau Locke Hume Ferguson Kant Herder Johann Friedrich Blumenbach and the Comte de Buffon As these philosophers develop important descriptive and comparative approaches to the human species and moral and social ideals of humanity they present a view of the Enlightenment project as a particular kind of humanism that is different from its Ancient and Renaissance predecessors With contributions from a team of internationally recognized scholars including Stephen Gaukroger Michael Forster C line Spector Jacqueline Taylor and G nter Z ller this book offers a novel interpretation of the Enlightenment that is both clear in focus and impressive in scope *The Profundity of Humanity* Dr. İlhami Fındıkçı,2018-11-01 The primary aim of our book is to determine define and describe the rapid loss of human value at the level of individuals and society and the humanity that we started to lose in the present day Our secondary goal is to discuss the basic emotions thoughts and behavioral models that will prevail over this depreciation which is against human nature Exploring Humanity Mihai I. Spariosu,Jörn Rüsen,2012-09-11 The old humanistic model aiming at universalism ecumenism and the globalization of various Western systems of values and beliefs is no longer adequate even if it pleads for an ever wider inclusion of other cultural perspectives and for intercultural dialogue In contrast it would be wise to retain a number of its assumptions and practices which it incidentally shares with humanistic models outside the Western world We must now reconsider and remap it in terms of a larger global reference frame This anthology does just that thus contributing to a new field of study and practice that could be called intercultural humanism *Theories of Human Nature - Third Edition* Peter Loptson,2006-01-06 This book explores the idea of human nature and the many understandings of it put forward by such diverse figures as Aristotle Rousseau Marx Freud Darwin and E O Wilson Each chapter looks at a different theory and offers a concise explanation assessing the theory s plausibility without forcing it into a mould Some chapters deal with the ideas of only one thinker while others such as the chapters on liberalism and feminism present a variety of different positions A clear distinction is made between theories of human nature and the political theories which so often follow from them For the new edition Loptson has addressed the new developments in the rapidly expanding genetic and paleontological record as well as expanded the discussion of the Christian theory of human nature by incorporating the ideas of the Marx scholar and social theorist G A Cohen The new edition has also been substantively revised and updated throughout

Humanity in the Mystery of God Jennifer Cooper,Jennifer Elaine Cooper,2009-08-30 A unique study of Schillebeekx s theological anthropology and his reflection on the nature of God as both creator and redeemer **Karl Barth and Radical Politics, Second Edition** George Hunsinger,2017-10-17 Karl Barth was one of the most important Christian theologians of the twentieth century but his political views have often not been taken sufficiently into account Beginning with a representative early essay by Karl Barth this volume proceeds with essays by Friedrich Wilhelm Marquardt Helmut

Gollwitzer Hermann Diem Dieter Schellong Joseph Bettis and George Hunsinger These contributions engage both the relationship of Barth's theology to his socialist politics as well as Marquardt's analysis This new edition expands upon the earlier one by adding three new essays by Hunsinger on Barth's theology and its relevance for human rights liberation theology and the theories of Ren Girard on violence and scapegoating Hunsinger has extended the discussion as well as deepened our insight into how theology can speak meaningfully about fundamental issues of human need With contributions from Karl Barth Friedrich Wilhelm Marquardt Helmut Gollwitzer Hermann Diem Dieter Schellong Joseph Bettis George Hunsinger

A Quest for Humanity Menno Boldt,2011-07-09 In A Quest for Humanity Menno Boldt presents a persuasive new framework for achieving a human social order in the global age Boldt explores the concept of the good society as a world in which every person can realize their potential for humanity through liberty social justice and equal human dignity A Quest for Humanity innovatively positions globalization as a deterministic phenomenon of expanding interdependence and shared knowledge resulting in ever larger economic and political jurisdictions but also creating social and psychological links between peoples across the world Boldt challenges mainstream certainty that Western democracy and constitutional human rights are the exemplary doctrines for the global good society With a fresh vision designed to inspire a universal acknowledgement of human dignity A Quest for Humanity powerfully affirms the value of each human being

Ten Nodes of Symbolizing Humanity Michael A. Susko,2024-09-06 Ten Nodes of Symbolizing Humanity applies a scientific model of logarithmic time to human cultural evolution charting how symbolic capacity unfolded in distinct accelerating stages over the last 8 million years Beginning with the first hominins and culminating near the rise of civilization this work identifies ten major nodes of symbolic emergence from habitual bipedalism and the earliest stone tools to abstract image making and burial of the dead Each node is supported by archaeological and paleontological evidence and interpreted through a framework of logarithmic halving revealing a patterned pulse of cultural and cognitive breakthroughs This study proposes that symbolic behavior evolved in tandem with biological change and was central to the human lineage Bridging anthropology evolutionary theory and systems modeling this work invites renewed scientific inquiry into the rhythmic structure of human evolution

May Human Beings Hear It! Sergei O. Prokofieff,2014-03-12 During the Christmas period of 1923 4 Rudolf Steiner

refounded the Anthroposophical Society at its headquarters in Dornach Switzerland This important event which has come to be known as the Christmas Conference can be studied on many levels and its many mysteries have been central to Sergei O Prokofieff's anthroposophical research over the years His beginning point has been an enduring question What did Rudolf Steiner mean when he called the Christmas Conference the start of a World Turning point of Time In this far reaching work the author working from several different viewpoints guides the reader towards an answer Prokofieff suggests that the impulse of the Christmas Conference can only be reenlivened today through conscious action by individuals to experience its spiritual essence Rather than offering dogmatic conclusions he opens up paths of approaching this goal by throwing light on different aspects of the Conference and what lies at its heart the Foundation Stone and its Meditation In particular Prokofieff explores three key perspectives the connection of the Christmas Conference with humanity's evolution the inner relationship of each individual anthroposophist to the Christmas Conference and the significance of the Conference to Rudolf Steiner himself Although this is major work of some length the individual chapters of May Human Beings Hear It are complete in themselves and can therefore be studied independently of each other

Lee, 2020-08-19 This book offers plausible explanations for people's puzzling unwillingness to address the human nature interactions that have led us to the precipice that is climate change today. Humanity and nature are at war; the evidence is all around us: catastrophic weather events, rising sea levels, extinction of species, famine, wildfires, melting polar ice, millions of environmental refugees, and toxic pollution of air, water, and soil. The list goes on and on. What is causing this war, and how can it be stopped? Is this war an unintended consequence of economic and environmental imperatives pulling in opposite directions? This book takes the question and its answer to a deeper level. It argues that the root cause of our war on nature might be found in the time-honored, historically deep myths, narratives, and stories we tell ourselves and have been telling ourselves for centuries about humanity's place in or out of the natural world.
