Injections and Infusions Coding Toolkit HCPro, 2014-05-14 Updated with 2012 CPT changes. Hospitals have long struggled under complicated guidelines for coding injection and infusion services. But those days are over. Now using a simple coding decision tree as your guide, you can master coding for these common procedures without having to master complex coding guidelines. The *Injections and Infusions Coding Toolkit* was developed by the staff at The University of Texas MD Anderson Cancer Center, a high-volume and world-renowned cancer treatment facility in Houston, TX. They designed a tool that makes it easy for staff to capture correct codes at point of service or for coders to use to assign appropriate codes to bill. The toolkit takes the guesswork out of selecting the initial service, deciding which codes can be reported in combination with other codes. Your toolkit is updated with 2012 CPT changes and includes everything you need to get started today, including 5 copies of the color-coded laminated coding decision tree, 5 copies of pocket-sized cheat sheets to help identify frequently used codes, a CD-ROM with the coding tree files you can customize for your facility, a PDF training guide, and a PowerPoint training presentation.
