| M1: Identifies $P$ is a rotation (through $\frac{\pi}{2}$ clockwise) AND $Q$ is a reflection (in the $y$ -axis).                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                              |       |      |
| M1: Hence deduce $M$ is a reflection (through line at angle $-\frac{\pi}{2}$ to the $x$ -axis) and so has a line of fixed points.                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                              |       |      |
| A1ft: All reasoning correct (including correct reflections/rotations if stated) and identifies the equation of the line. Follow through as above.                                                                                                                                                                  |                                                                                                                                                                                                                                                                                              |       |      |
