Fortifications of the October War 1973 Simon Dunstan, 2012-09-20 The Bar Lev Line along the Suez Canal was born out of the overwhelming victory of the Israel Defence Forces IDF in the Six Day War of 1967 Devastated by their defeat the Egyptian army bombarded Israeli positions causing many casualties Accordingly the IDF Chief of Staff General Haim Bar Lev ordered the construction of a series of fortified positions named the Bar Lev Line Each position was surrounded by barbed wire and minefields and virtually immune to strikes by artillery shells and even 500kg bombs On 6 October 1973 Yom Kippur the positions were manned by just 436 reservists when the Egyptian Second and Third Armies launched a massive offensive along the Suez Canal The positions were quickly cut off from the supporting elements and the Israeli defenders paid a high

price with a casualty rate of almost 50 per cent Despite these losses it was not the Bar Lev Line that failed but Israel's military and political establishment which realised Arab intentions too late

The Oxford Handbook of the Incas Sonia Alconini, R. Alan Covey, 2018-04-02 When Spaniards invaded their realm in 1532 the Incas ruled the largest empire of the pre-Columbian Americas Just over a century earlier military campaigns began to extend power across a broad swath of the Andean region bringing local societies into new relationships with colonists and officials who represented the Inca state With Cuzco as its capital the Inca empire encompassed a multitude of peoples of diverse geographic origins and cultural traditions dwelling in the outlying provinces and frontier regions Bringing together an international group of well established scholars and emerging researchers this handbook is dedicated to revealing the origins of this empire as well as its evolution and aftermath Chapters break new ground using innovative multidisciplinary research from the areas of archaeology ethnohistory and art history The scope of this handbook is comprehensive It places the century of Inca imperial expansion within a broader historical and archaeological context and then turns from Inca origins to the imperial political economy and institutions that facilitated expansion Provincial and frontier case studies explore the negotiation and implementation of state policies and institutions and their effects on the communities and individuals that made up the bulk of the population Several chapters describe religious power in the Andes as well as the special statuses that staffed the state religion maintained records served royal households and produced fine craft goods to support state activities The Incas did not disappear in 1532 and the volume continues into the Colonial and later periods exploring not only the effects of the Spanish conquest on the lives of the indigenous populations but also the cultural continuities and discontinuities Moving into the present the volume ends with an overview of the ways in which the image of the Inca and the pre-Columbian past is memorialized and reinterpreted by contemporary Andeans

The Fortifications of Malta 1530-1945 Charles Stephenson, 2012-11-20 The Island of Malta occupies a pivotal position in the Mediterranean forming an outpost between North Africa and the soft underbelly of Europe Such has been its strategic importance throughout the years that it has become one of the most fortified places in the world Following the successful defence of the island during the Great Siege of 1565 the Knights Hospitaller built new walls and fortifications These defences failed when Napoleon occupied Malta in 1798 and the island

was retaken by the British in 1800 From this point onwards Malta's defences were modernised throughout the 19th century and the island's final test came during World War II This book examines all these different styles of fortification from the 16th to the 20th century

The Fortifications of Ancient Israel and Judah 1200-586 BC Samuel Rocca,2012-10-20 This book provides a detailed study of the fortifications of the founders of ancient Israel from the time of their first settlement in the Middle East through the periods of the united and divided kingdoms until the sack of Jerusalem in 586 BC It begins in the period of Israelite settlement in the First Iron Age period 1200 1000 BC The extensive fortifications created by the famous kings Saul David and Solomon are covered including Gibeah Jerusalem Megiddo Hazor and Gezer which are described in the Bible The period of the Divided Monarchy saw the creation of two separate political

entities the kingdoms of Israel and Judah The enemies the two kingdoms faced in this period included Moab Edom and the Arameans as well as the mighty empires of Assyria Babylonia and Egypt This book is a must have for fans of warfare in the ancient Middle East Fortifications and Siegecraft Jeremy Black,2018-05-25 As centers for defense and bases for attack since ancient times fortifications are a crucial aspect of military history Indeed as Jeremy Black shows the history of fortifications is a global history of humanity itself Moreover their remains offer a still potent often dramatic testimony to the past notably through the strength of the sites the power of the works and the vast resources they required This compelling book explores not only the history of fortifications themselves but also the real and potential threat to them posed by siegecraft Tracing the interaction of attack and defense over time Black situates the evolution of fortifications within the wider development of governments societies and cultures Moreover his examination of the future of these installations as well as of potential methods of destroying them only reaffirms their omnipresence in human history and their continued importance Fortifications are not simply relics of the past but rather elements fundamental to military and social interaction across the world today **The Maginot Line 1928-45** William Allcorn,2012-07-20 The Maginot Line the massive series of fortifications built by France in the 1930s to defend its borders with Germany and Italy is perhaps the most maligned collection of fortifications ever built Despite being a technological marvel and the most sophisticated and complex set of fortifications built up to that time it failed to save France from crushing defeat in 1940 Yet there are those who argue that it accomplished exactly what it was designed to do This book provides a concise and informative treatment of the Maginot Line from North East France to the Mediterranean Packed with plans contemporary and modern images plus digital artwork it presents a detailed visual exploration of this famous fortification system **Fortresses of the Peninsular War 1808-14** Ian Fletcher,2012-07-20 In the course of the Peninsular War Wellington's army fought several hard battles and smaller actions but it was the bloody sieges that troubled him more than anything else Indeed the performance of his army during the sieges was probably the most disappointing aspect of what was otherwise an extremely successful campaign Taking 1808 as its starting point this title deals with the fortress sieges that involved Wellington's Anglo Portuguese army and concentrates on four key sites in particular Ciudad Rodrigo Badajoz Burgos and San Sebastian All of these played a vital role in the war due to their strategically important positions It documents both the sieges and the storming of the fortresses as well as the general role of the fortresses in Spain and the impact they had on the thinking of the commanders and strategies of the armies involved **The German Fortress of Metz 1870-1944** Clayton Donnell,2013-01-20 Following the defeat of France in the Franco Prussian War of 1870-71 the German Army began to construct a fortress line from Strasbourg to Luxembourg to protect their new territory the centrepiece of which was the great Moselstellung Moselle Position of Metz Thionville Illustrated with rare photographs and full colour cutaway artwork this book examines the design and development of the fortress and analyses its use in combat focusing particularly on the part it played in holding up General Patton's Third

Army's advance across France in 1944 [The Atlantic Wall \(1\)](#) Steven J. Zaloga, 2012-11-20 Germany's Atlantic Wall was the most ambitious military fortification program of World War II. With Germany's gradual loss of the strategic initiative to the Allies in 1942, Hitler was forced to construct an impenetrable wall of fortifications along the Atlantic and Mediterranean coast. This book deals solely with the structures on the French coast, starting with the Pas de Calais and extending down to Spain. It features detailed illustrations and diagrams of the various sections of the Atlantic Wall and the role that they played, giving a thoughtful analysis of some of the most accessible fortifications of World War II **Fortress Monasteries of the Himalayas** Peter Harrison, 2012-08-20 An illustrated guide to the development and operational history of the Tibetan style fortified monasteries throughout the Himalayas. The spread of Buddhism and Tibetan secular power throughout the Himalayas led to a distinctive style of fortifications not found anywhere else. This book looks at Himalayan fortifications from their creation in the Middle Ages to their destruction and capture by the Chinese in the 20th century **The Walls of Constantinople AD 324-1453** Stephen Turnbull, 2012-08-20 The walls of Constantinople are the greatest surviving example of European medieval military architecture in the world. They withstood numerous sieges until being finally overcome by the artillery of Mehmet the Conqueror in 1453 and exist today as a time capsule of Byzantine and Medieval history. This book examines the main defensive system protecting the landward side of the city, which consisted of three parallel walls about 5 miles long. The walls defended the city against intruders including Attila the Hun, before finally being breached by European knights during the Fourth Crusade in 1204 and ultimately destroyed by Turkish artillery in 1453 *The Lines of Torres Vedras 1809-11* Ian Fletcher, 2012-07-20 Following the battle of Bussaco on 27 September 1810, Wellington's heavily outnumbered troops began to withdraw towards Lisbon. By the evening of 9 October, the British and Portuguese began to withdraw behind a line of defensive works that had been built to the north of Lisbon. These were not the rudimentary field works that the French anticipated, but an enormous network of forts, batteries, and redoubts whose construction had been started the previous November. The Lines of Torres Vedras, this 30-mile wide line, utilised the area's natural defences, damming rivers, scarping hillsides, blocking roads, and establishing forts upon almost all of the hills. This title describes its design, creation, and effectiveness in the face of French attacks.
