Zadorozhny,Erik Buchmann,2010-06-23 Wireless Sensor Network Technologies for Information Explosion Era The amount and value of information available due to rapid spread of information technology is exploding Typically large enterprises have approximately a petabyte of operational data stored in hundreds of data repositories supporting thousands of applications Data storage volumes grow in excess of 50% annually This growth is expected to continue due to vast proliferation of existing infor tion systems and the introduction of new data sources Wireless Sensor Networks WSNs represent one of the most notable examples of such new data sources In recent few years various types of WSNs have been deployed and the amount of information generated by wireless sensors increases rapidly The information pllosion requires establishing novel data processing and communication techniques for WSNs This volume aims to cover both theoretical and practical aspects lated to this challenge and it explores directions for future research to enable ef cient utilization of WSNs in the information explosion era The book is organized in three main parts that consider 1 technical issues of WSNs 2 the integration of multiple WSNs and 3 the development of WSNs systems and testbeds for conducting practical experiments Each part consists of three chapters *Indigenous People, Crime and Punishment* Thalia Anthony,2013-07-24 Indigenous People Crime and Punishment examines criminal sentencing courts changing characterisations of Indigenous peoples identity culture and postcolonial status Focusing largely on Australian Indigenous peoples but drawing also on the Canadian experiences Thalia Anthony critically analyses how the judiciary have interpreted Indigenous difference Through an analysis of Indigenous sentencing remarks over a fifty year period in a number of jurisdictions the book demonstrates how judicial discretion is moulded to dominant white assumptions about Indigeneity More specifically Indigenous People Crime and Punishment shows how the increasing demonisation of Indigenous criminality and culture in sentencing has turned earlier gains in the legal recognition of Indigenous peoples on their head The recognition of Indigenous difference is thereby revealed as a pliable concept that is just as likely to remove concessions as it

is to grant them Indigenous People Crime and Punishment suggests that Indigenous justice requires a two way recognition process where Indigenous people and legal systems are afforded greater control in sentencing dispute resolution and Indigenous healing **Government Information on the Internet** Greg R.
