Resources in Education ,1998-07 **Biology** ,1986 Womb Politics: A Short History of the Future of Human Reproduction Frida Simonstein,2022-10-15 This book offers a vision of politics that govern the womb from antiquity be fertile and replenish the earth through the ages hysterectomy to extirpate women s hysteria up to the present time abortion wars assisted reproduction and into the future reprognetics the artificial womb It explores how the womb has served humanity either tacitly or explicitly through the ages and examines how women have accepted and still perceive the rules created by men as natural including the new anti abortion laws in the USA because that is the way things are The book also explores how the emerging of assisted reproduction technologies and novel genetic tools reprognetics will pose additional challenges to womb bearers as all women will be made to reproduce with IVF What is more the advent of the artificial womb is in sight the gender and social implications of this development would be enormous Certainly not just another organ the womb has been and remains a powerful tool that cannot be left to the decisions of half of the population This book engages a wide audience including women and men professionals and laypersons who are interested in gender politics legislation women s health and ethics , *Are They Human Yet?* The Homo sapiens Project,2007-02-26 What is the essence of humanity What would an integrated science of Homo sapiens the human species include Would such an understanding allow the species to manage itself better Is the species making any progress at all along these lines Or is its burgeoning material progress the best and most that should be expected of it These are the kinds of questions that this modest little volume has the boldness to address Presented as the draft report of The Homo sapiens Project the book summarizes the current status of the human species including its knowledge and management of itself Written as a Consultation Draft the book seeks feedback from readers and researchers interested in the future of humanity Although the report was allegedly written by The Homo sapiens Project the manuscript was brought to us by a person who prefers to remain anonymous at this time Neither that person not the publisher can validate its authenticity Its apparent strength and robustness as an hypothesis convinced us to proceed with publication said the publisher recently Read for yourself how the difference or is it war between the sexes plays itself out in the human societies on planet Earth Read where this species has come from and where it is now according to this ostensibly independent and objective analysis Then follow the hints towards the end of the book and muse about how the future of humanity might unfold For the basis for acting on a human future is here too But be warned The knowledge developing from this line of reasoning can be put to both good and evil purposes The choice will be yours to find the right balance for the future of the species once you understand *Are They Human Yet* poses a rhetorical question with a serious intent Help choose a human future read this book *Human Reproduction* Tommy Nicholas Evans,1973 **Family Planning** Zouhair Amarin,2018-06-13 Women with unmet need for family planning are those who are fecund but are not using any method of contraception not wanting any more children or wanting to delay the next pregnancy This notion points

to the gap between women's reproductive intentions and their contraceptive behavior. The need for contraception remains too high. This circumstance is made worse by both a growing population and a shortage of family planning services. It is important that family planning is widely available and easily accessible. This book is intended as an aid to substance that all health workers interested in becoming more effective practitioners will consult on many occasions during their clinical practice. It provides views that the readers can test their experiences against. It presents sound and clear advice on some of the most practical guidance applicable to family planning.
