

**Ready for your Module 4 DBA? Make sure that you can answer the following questions before attempting your DBA. I look forward to speaking with you!**

**What is an adaptation?**

It's the characteristics or functions and behaviors of natural selection.

**How does the environment influence adaptations?**

Environments are constantly changing and the population always is changing. An individual must struggle for survival. For example, the giraffes have long necks to reach the leaves of the acacia trees. Their long necks help them to reach the leaves of the acacia trees. Their long necks help them to reach the leaves of the acacia trees. Their long necks help them to reach the leaves of the acacia trees.

**How do adaptations help an organism survive?**

When an individual has a trait that is helpful to it, it is called an adaptation. Adaptations help an individual to survive in its environment. The individual will have a better chance of surviving than the other individuals in the population. The individual will have a better chance of surviving than the other individuals in the population. The individual will have a better chance of surviving than the other individuals in the population.

**How do different adaptations allow organisms to survive in different environments?**

For example, a bird that lives in a desert environment will have adaptations that help it survive in that environment. The bird will have a better chance of surviving than the other birds in the population. The bird will have a better chance of surviving than the other birds in the population. The bird will have a better chance of surviving than the other birds in the population.

**What is natural selection?**

Natural selection is the process by which organisms that are better adapted to their environment survive and reproduce. Natural selection is the process by which organisms that are better adapted to their environment survive and reproduce. Natural selection is the process by which organisms that are better adapted to their environment survive and reproduce.

**What are the 4 conditions required for natural selection?**

1. There must be variation in the population. 2. The variation must be heritable. 3. There must be a struggle for survival. 4. The individuals with the most favorable traits will survive and reproduce. Natural selection is the process by which organisms that are better adapted to their environment survive and reproduce. Natural selection is the process by which organisms that are better adapted to their environment survive and reproduce.
