The Inner Lives of Markets Ray Fisman, Tim Sullivan, 2016-06-07 America's economic revolution isn't just driven by technology It's about markets The past twenty five years have witnessed a remarkable shift in how we get the stuff we want If you've ever owned a business rented an apartment or shopped online you've had a front row seat for this revolution in progress Breakthrough companies like Amazon and Uber have disrupted the old ways and made the economy work better all thanks to technology At least that's how the story of the modern economy is usually told But in this lucid wry book Ray Fisman and Tim Sullivan show that the revolution is bigger than tech it is really a story about the transformation of markets From the auction theories that power Google's ad sales algorithms to the models that online retailers use to prevent internet fraud even the most high tech modern businesses are empowered by theory first envisioned by economists And we're all participants in this revolution Every time you book a room on Airbnb hire a car on Lyft or click on an ad you too are reshaping our social institutions and our lives The Inner Lives of Markets is necessary reading for the modern world it reveals the blueprint for how we work live and shop and offers wisdom for how to do it better

**Modernity** Peter Wagner, 2013-04-18 We live in a modern age but what does modern mean and how can a reflection on modernity help us to understand the world today These are the questions that Peter Wagner sets out to answer in this concise and accessible book Wagner begins by returning to the question of modernity's Western origins and its claims to open up a new and better era in the history of humanity Modernity's claims and expectations have become more prevalent and widely shared but in the course of their realization and diffusion they have also been radically transformed In an acute and engaging analysis Wagner examines the following key issues among others Modernity was based on the hope for freedom and reason but it created the institutions of contemporary capitalism and democracy How does the freedom of the citizen relate to the freedom of the buyer and seller today And what does disaffection with capitalism and democracy entail for the sustainability of modernity Rather than a single model of modernity there is now a plurality of forms of modern socio political organisation What does this entail for our idea of progress and our hope that the future world can be better than the

present one All nuance and broadening notwithstanding our concept of modernity is in some way inextricably tied to the history of Europe and the West How can we compare different forms of modernity in a symmetric non biased or non Eurocentric way How can we develop a world sociology of modernity      Guide to U.S. Environmental Policy Sally K. **Civic Learning through Agricultural Improvement** Glenn P. Lauzon,2010-12-01 How do people use education to respond to change How do people learn what is expected of good citizens in their communities These questions have long

concerned educational historians civic educators and social scientists In recent years they have captured national attention through high profile education reform proposals and civic initiatives The historian who reviews the relevant literature however will discover something odd most of it focuses on schooling despite the fact that prior to the middle of the twentieth century formal schooling played only a small but significant part in most people s lives What other educational forces and institutions bring civic ideals to bear upon minds and hearts This question is rarely raised At issue is a conceptual problem we today tend to equate education with schooling Do county fairs and farmers associations have anything to do with civic education Drawing insights from debates at the time of the founding of the history of education as a branch of modern scholarship this author asserts that they do Using the life of county fairs farmers associations and farmers institutes as its central thread this book explores how prominent town dwellers and leading farmers tried to use agricultural improvement to grow towns and to shape civic sensibilities in the rural Midwest Promoting economic development was the foremost concern but the efforts taught farmers much about their place as good citizens of industrializing communities As such this study yields insights into how rural people of the nineteenth century came to accept the ideal that town and country were interdependent parts of the same community In doing so it reminds educators and historians that much education and learning particularly of the civic sort takes place beyond the schoolhouse
