Drawing Music, Marking Time David Griffin, 2025-01-23 Marking down the complexities of musical pieces on paper allows them to become portable shareable and eminently teachable but how are the simple geometries of a music notation unfolded into space and time A music notation is an almost impossibly complicated bit of drawing Calling it a map or a diagram does not quite do the trick Its tracery supplies mechanisms for planning composition analysis annotation and performance of music But how is it that we read that simple strategic two dimensional geometry and make such complex four dimensional performances In this book David Griffin guides readers to a comprehensive understanding of the structural properties of music notations with a particular focus on the standard Western staff notation system looking at composers such as Bach John Cage Earle Brown and Stockhausen Developed over a thousand years ago the staff notation is a geometrical drawing method using dots and lines on a horizontal timeline for explaining the structure of a musical piece The system behaves a bit like a picture but it is also like a diagram and a bit like writing in its structure In the hands of an experienced user the notation s complex of marks and phatic elements allows us to leave behind the mere denotation of diagrams or pictures to become a connotative drawing system This book will attempt to de code music drawings untangling their strange knots of graphic and linguistic elements Using a series of visual examples Griffin presents background information on how the staff notation developed as an inter linguistic inscription a drawing that slips through the mere denotation of pictorial or diagrammatic graphics to become a connotative system with which we may craft subtle and powerful elements of musical poetry

Empires of Print Patrick Scott Belk, 2017-05-08 At the turn of the twentieth century the publishing industries in Britain and the United States underwent dramatic expansions and reorganization that brought

about an increased traffic in books and periodicals around the world Focusing on adventure fiction published from 1899 to 1919 Patrick Scott Belk looks at authors such as Joseph Conrad H G Wells Conan Doyle and John Buchan to explore how writers of popular fiction engaged with foreign markets and readers through periodical publishing Belk argues that popular fiction particularly the adventure genre developed in ways that directly correlate with authors experiences and shows that popular genres of the late nineteenth and early twentieth centuries emerged as one way of marketing their literary works to expanding audiences of readers worldwide Despite an over determined print space altered by the rise of new kinds of consumers and transformations of accepted habits of reading publishing and writing the changes in British and American publishing at the turn of the twentieth century inspired an exciting new period of literary invention and experimentation in the adventure genre and the greater part of that invention and experimentation was happening in the magazines
