Entrepreneurship N4 Examination Paper

Adam K. Korobow

Entrepreneurship N4 Examination Paper:

Entrepreneurial Wage Dynamics in the Knowledge Economy Adam K. Korobow, 2012-12-06 The role that small firms and entrepreneurship play in economic development has been particularly contentious Joseph Schumpeter 1911 in his early work argued that through a process of creative destruction small and new firms would serve as agents of change and a catalyst for innovation and growth But he later rescinded this view instead concluding that large corporations were the engines of growth Just as it seemed that a consensus had emerged among scholars and policy makers that small business was at best superfluous and at worst a drag on growth and economic development David Birch provided evidence that in fact small firms were the engines of job creation The early skepticism of challenge to Birch s findings revolved around methodology and measurement However a wave of subsequent studies by different authors spanning different time periods sectors and even countries generally confirmed Birch s original findings for most developed countries and in most time periods small business has provided most of the job creation
