Kim and Martin swam 50 meters. Martin took 0.26 second longer than Kim. What was Martin's time in the race?

Be Precise Why is precision important when working with decimals?

Find $50.9 + 0.26$.

Estimate first by rounding each addend.

50.9 rounds to 51.

0.26 rounds to 0.3.

$$51 + 0.3 = 51.3$$

Find the sum.

$$\begin{array}{r} 50.90 \\ + 0.26 \\ \hline \end{array}$$

Annex a **zero** so each place has a digit.

Remember to line up the place values to add.

Add each place.

$$\begin{array}{r} 50.90 \\ + 0.26 \\ \hline 51.16 \end{array}$$

You can regroup the sum of nine tenths and two tenths.

Martin swam the race in 51.16 seconds. The sum 51.16 is close to the estimate, 51.3.

Try It!

Suppose that Martin finished the race 0.47 second after Kim. What was Martin's time in the race? Use an estimate to check that your answer is reasonable.

Convince Me! If Martin finished the race 0.267 second after Kim, you would need to add 0.267 to 50.9 to solve the problem. How is adding 0.267 to 50.9 different from adding 0.26 to 50.9?

A Guide to Detracking Math Courses Angela Torres,Ho Nguyen,Elizabeth Hull Barnes,Laura Wentworth,2023-05-03
Create a pathway to equity by detracking mathematics The tracked mathematics system has been operating in US schools for decades However research demonstrates negative effects on subgroups of students by keeping them in a single math track thereby denying them access to rigorous coursework needed for college and career readiness The journey to change this involves confronting some long standing beliefs and structures in education When supported with the right structures instructional shifts coalition building and educator training and support the detracking of mathematics courses can be a primary pathway to equity The ultimate goal is to increase more students access to and achievement in higher levels of mathematics learning especially for students who are historically marginalized Based on the stories and lessons learned from the San Francisco Unified School District educators who have talked the talk and walked the walk this book provides a model for all those involved in taking on detracking efforts from policymakers and school administrators to math coaches and teachers By sharing stories of real world examples lessons learned and prompts to provoke discussion about your own context the book walks you through Designing and gaining support for a policy of detracked math courses Implementing the

policy through practical shifts in scheduling curriculum professional development and coaching Supporting and improving the policy through continuous research monitoring and maintenance This book offers the big ideas that help you in your own unique journey to advance equity in your school or district s mathematics education and also provides practical information to help students in a detracked system thrive *Tyranny of the Textbook* Beverlee Jobrack,2011-12-23 Educational reforms and standards have been a topic of public debate for decades with the latest go round being the State Common Core Curriculum Standards But time and again those reforms have failed and each set of standards no matter how new and different has had little impact on improving student achievement Why The textbooks Textbooks sell based on design and superficial features not because they are based on the latest research on how children learn and how well they promote student achievement In *Tyranny of the Textbook* Beverlee Jobrack retired from educational publishing sheds light on why this happens She gives an engaging and fascinating look behind the scenes of how K 12 textbooks are developed written adopted and sold And perhaps most importantly she clearly spells out how the system can change so that reforms and standards have a shot at finally being effective Did you know Reform efforts have focused on writing and rewriting standards and tests but these rarely have any effect on the core curriculum that is published School districts and states don t use effectiveness as a criterion for evaluating and purchasing textbooks Publishers don t offer textbooks with better content or the latest teaching methods because teachers don t want textbooks that require them to change their practices Teachers report that they don t rely on a textbook in their class but research shows that they do Three companies publish 75 percent of the K 12 educational materials Those three companies are producing similar programs with the same instructional strategies none of which require teachers to change their practices significantly Publishers write textbooks for California and Texas All of the other markets have to make do with books only superficially adjusted for their states

Expanding the Numerical Central Conceptual Structure Laura Christine Bofferding,2011 In working with integers students have difficulties that may extend into middle school and even adulthood However even young children can display insights into negative numbers well before receiving formal instruction Using a pre test instruction post test design this study explores how 61 first graders reason about negative number properties and operations and how their understanding changes depending on the instruction they receive Results of the study indicate that children build on their existing whole number understanding to develop a central conceptual structure for integers Furthermore the process by which they extend their numerical central conceptual structure differs among students their initial schemas together with the form of the integer instruction influence how they reason about and solve integer addition and subtraction problems These results highlight the need to revisit the placement duration and content of integer instruction in curricula

Tyranny of the Textbook , Language Policy Processes and Consequences Sarah C.K. Moore,2014-06-30 This book traces the recent socio historical trajectory of educational language policy in Arizona the state with the most restrictive English only implementation in the US Chapters each representing a case

study of policy making in the state include an overview and background of the English only movement the genesis of Structured English Immersion SEI and current status of language policy in Arizona an in depth review of the Flores case presented by its lead lawyer a look at early Proposition 203 implementation in the context of broader educational reform efforts examples of how early state wide mandates impacted teacher professional development a presentation of how new university level teacher preparation curricula misaligns with commonly held beliefs about what teachers of language minority students should know and understand an exploration of principals concerns about enforcing top down policies for SEI implementation an investigation of what SEI policy looks like in today s classrooms and whether it constitutes equity and finally a discussion of what the various cases mean for the education of English learners in the state *Closing the School Discipline Gap* Daniel J. Losen, 2014-12-01 Educators remove over 3.45 million students from school annually for disciplinary reasons despite strong evidence that school suspension policies are harmful to students The research presented in this volume demonstrates that disciplinary policies and practices that schools control directly exacerbate today s profound inequities in educational opportunity and outcomes Part I explores how suspensions flow along the lines of race gender and disability status Part II examines potential remedies that show great promise including a district wide approach in Cleveland Ohio aimed at social and emotional learning strategies *Closing the School Discipline Gap* is a call for action that focuses on an area in which public schools can and should make powerful improvements in a relatively short period of time
