

The "New 350" film recorder enables you to produce a whole number of special effects, double exposures or captions with ease by recording your super 8 film.  
The recorder is suitable for silent and sound cartridges.

#### INSTRUCTIONS

1. A cartridge should not be used for double exposures at the beginning or end of the film as neither the first one or two meters nor the last two meters are suitable for recording. If you wish to start with a double exposure, take the cartridge out of the camera when it is advisable to roll down the footage count on the cartridge to the number you wish to start from. CAREFULLY CHECK THE CARTRIDGE'S TAKE-UP COILS WITH CARE. DO NOT EXCEED ADVISABLE COUNT OF A COILS OR OTHERWISE ADVISABLE TAKE (Figure 1). This prevents the camera's take-up shaft from gripping it, thus rolling up the film during subsequent shooting.
2. Then insert the cartridge in the camera, and film the scene or the desired picture up to a maximum of 10 seconds. Make sure that the recorder lever is set to 00 for silent cartridges and to 05 sound for sound cartridges.
3. Now remove the cartridge from the camera. REMOVE ADVISABLE COILS or TAKE COUNT and insert cartridge into the film recorder from above as illustrated in Figure 2. If you see the change in the light, the unprotected traces in the cartridge are exposed and must be added out later. This can be prevented by working with the film recorder in the dark.
4. Now the film can be rewound. Each turn of the rewind button in the direction of the arrow rewinds the film 10 frames (Figure 3). The rewind procedure is complete when you sense a slight resistance.
5. During recording it is necessary to occasionally shake the recorder gently in the manner demonstrated in Figure 4. At intervals of the output motion, the film in the cartridge returns to its original rest position. When the recording procedure is complete remove the cartridge from the recorder. Now replace the cartridge in the camera and superimpose the scene. If no further double exposures are desired, then film to the end of the cartridge in normal manner. Otherwise repeat the above operation.
