

ELECTRONIC PROTECTION FOR EXAM PAPER LEAKAGE

AIM:

The main aim of this project is to protect and control the question paper leakage system.

PURPOSE:

The idea for the proposed system which involves the electronic protection is derived from modern day applications like Electronic lockers in bank, Home security systems, Office security systems and other security enhanced electronic systems.

DESCRIPTION:

Now a day, every system is automated in order to face new challenges in the present day situation. Automated systems have less manual operations, so that the flexibility, reliabilities are high and accurate. Hence every field prefers automated control systems. Especially in the field of electronics automated systems are doing better performance increasingly.

The proposed hardware design for the system is, the heart of the system is 8051. Along with it many components are used such as RFID, GSM, keys, DC motor and motor drivers, etc are used. Whenever the person wants to open the lock of the examination box then he need to show his authentication with the help of rfid technology and whenever the person shows the rfid tag in front of the rfid reader. Here the rfid reader reads the data from the tag and sends the data to the microcontroller. Here the microcontroller receives the information and
