WIP: The Executioners Three (TET)

I'm avoiding writing. I don't know why — once I start, I tend to get in the zone and this next scene should be exciting. I guess I'm scared. It's daunting — completely rewriting a book. AGAIN. There is time #3 and I feel like I don't quite have Fiddle's voice — maybe I'm trying too hard on not hard enough. It feels kinda meh is all I know. Plus, I don't have Simon's voice at all... But HEY, soz Did you have Sam or Sasha right away? No. It took some false starts and rewrites. So why are you expecting so much? All I need to do is hammer out a scene a day until I leave for Australia (or hit 100 pages). If I can get 16 pages/day, I'll reach my goal by November. Remember: there's no real rush here. Truthswitch is on submissions, Karen can WAIT for this, and book 3 is all done. Books take time, soz. Patience.

Now, go write the next scene. ♥

HOURS LATER: Okay. ~900 words and some ~~more~~ editing of scene 1 later, and I'm trying to psych myself up to scene #3. I have a total of 10-11 pages, which puts me EXACTLY on track. But I'd rather get AHEAD of track. ☺

Instructional Guidance Slava Kalyuga, 2015-05-01 The book explores a cognitive load perspective on instructional guidance Cognitive load theory is focused on instructional design implications and prescriptions that flow from human cognitive architecture and it has become one of the leading theories of instructional design According to this theoretical perspective the purpose of instructional guidance is to reduce learner potential cognitive overload by providing appropriate information in the right time and in a suitable format As the learner's level of prior knowledge is considered as the main factor influencing this decision the effect of learner prior knowledge on effectiveness of instructional methods the expertise reversal effect in cognitive load theory provides the basic framework for the book The fully guided direct instruction and minimally guided inquiry discovery or exploratory learning are often discussed in instructional psychology literature as examples of approaches with opposed degrees of guidance provided to the learners This book considers the whole range of the levels of guidance including intermediate levels and approaches the problem of balancing learner guidance from a cognitive load perspective The significance of this approach is in applying our current knowledge of human cognitive architecture to develop an integrated instructional approach bringing together the best features and advantages of direct instruction and inquiry learning Both direct instruction and inquiry learning approaches have been around for long time and their proponents can produce evidence of their effectiveness This evidence needs to be treated within the context of appropriate learning goals in specific instructional settings for specific types of learners This book provides an unbiased theoretical framework for managing learner instructional guidance and working principles for selecting appropriate levels and methods of instructional guidance e.g. sequences of exploratory problems and explicit instruction forms and levels of embedded guidance and adapting methodologies optimal for learners at different levels of prior knowledge
