

AP Chemistry: A Sample Formal Laboratory Report

This paper is designed to help you prepare a chemistry lab report. Keep it in your chemistry notebook. All chemistry lab reports must be written neatly and well organized to receive full credit. Lab reports may be written or typed. It is highly recommended that you use graph or engineering bond paper for written reports.

Laboratory #7: Quantitative Determination of an Empirical Formula

I. Hypothesis: If nitric acid is poured onto tin, a tin oxide will be produced. If we know the initial mass of the tin metal and the mass of the final product, we can determine the empirical formula of the tin oxide product. There should be a whole number ratio between oxygen and tin. *(The hypothesis explains what is to be tested and will be written after reading the entire laboratory worksheet.)*

II. Equipment: *(Non-chemical equipment used in the experiment.)*
evaporating dish
watch glass
stirring rod
burner with ring stand, ring and wire gauze
forceps
beaker
balance

III. Reagents: *(A listing of chemicals used in the experiment with their amounts and any warnings.)*
tin metal (granulated) ~2 g.
5 cm³ (mL) nitric acid (HNO₃) **caution! severe burns**

IV. Procedure: Each step of the procedure must be written here. You may paraphrase and shorten the explanations, but the reader must be able to perform the experiment from these instructions. *(The procedure must be read carefully before the lab begins. Drawings of the experimental setup may be included here. The teacher may make changes to the procedure; make sure that you write any changes down!)*

V. Data: *(If the laboratory report is handwritten use a ruler to draw data tables and graphs! Always include units with all data entries.)*

	Procedure	Trial 1	Trial 2
a	mass of dish, and watch glass	74.14 g	
b	mass of dish, glass and tin	76.20 g	
c	mass of tin =b-a	2.06 g	
d	moles of tin	.0173 mol	
e	mass of dish, glass, and product	76.76 g	
f	mass of oxygen =e-b	.56 g	
g	moles of oxygen	.0350 mol

Doubt is Their Product David Michaels,2008-04-23 Doubt is our product a cigarette executive once observed since it is

the best means of competing with the body of fact that exists in the minds of the general public It is also the means of establishing a controversy In this eye opening expose David Michaels reveals how the tobacco industry s duplicitous tactics spawned a multimillion dollar industry that is dismantling public health safeguards Product defense consultants he argues have increasingly skewed the scientific literature manufactured and magnified scientific uncertainty and influenced policy decisions to the advantage of polluters and the manufacturers of dangerous products To keep the public confused about the hazards posed by global warming second hand smoke asbestos lead plastics and many other toxic materials industry executives have hired unscrupulous scientists and lobbyists to dispute scientific evidence about health risks In doing so they have not only delayed action on specific hazards but they have constructed barriers to make it harder for lawmakers government agencies and courts to respond to future threats The Orwellian strategy of dismissing research conducted by the scientific community as junk science and elevating science conducted by product defense specialists to sound science status also creates confusion about the very nature of scientific inquiry and undermines the public s confidence in science s ability to address public health and environmental concerns Such reckless practices have long existed but Michaels argues that the Bush administration deepened the dysfunction by virtually handing over regulatory agencies to the very corporate powers whose products and behavior they are charged with overseeing In Doubt Is Their Product Michaels proves beyond a doubt that our regulatory system has been broken He offers concrete workable suggestions for how it can be restored by taking the politics out of science and ensuring that concern for public safety rather than private profits guides our regulatory policy Named one of the best Sci Tech books of 2008 by Library Journal
