Persona	User Story	Tasks	Experience
Type: <u>FPGA Customer</u> Tim Benkowski Job Title: Engineering Manager	As a FPGA customer and engineering manager... I need to provide my team with development and programming training for the new Xonker FPGA we will be using in our new project... ...so that my team can limit their learning curve and be productive out of the gate.	<ol style="list-style-type: none">1. Find FPGA training classes for the Xonker Device (Browse or Search)2. Review classes offered and select the right classes for my team3. Purchase the classes I need and assign my team members to each class4. Track each team member's progress with their training class	Great... I was able to find the classes that fit our requirements and schedule, get the class information to make a decision on the class best suited for project, easily purchase, and assign my team members to the classes... AND I was able to log in and track each team member's progress, and completion. FPGA really knows how to support their products!

Next Steps:

1. Develop a minimum of 3 personas and users stories
2. Review with UX Design Team
3. Design wire frames that illustrate key tasks and user stories.

Architectural Design Decision Documentation through Reuse of Design Patterns Durdik, Zoya, 2016-07-07 The ADMD3 approach presented in this book enhances the architectural design documentation of decision via reuse of design patterns. It combines the support for evaluation of pattern application, semi-automated documentation of decision rationale and trace links. The approach is based on a new kind of design pattern catalogue whereby usual pattern descriptions are captured together with question annotations to the patterns and information on architectural structure of patterns. **Proceedings of the First International Workshop on Intelligent Software Automation** Sajid Anwar, Abdul Rauf, 2021-06-25 This book is a collection of research papers presented at the International Workshop on Intelligent Software Engineering Automation ISEA 2020 in the 27th Asia Pacific Software Engineering Conference APSEC 2020 during 1-4 December 2020 in Singapore. The book discusses automated tools and techniques which are required to reflect over business knowledge to identify what is missing or could be effectively changed while producing and evolving. The book presents works from international researchers and practitioners in the fields of intelligent software engineering, automated software engineering, to discuss applications, experiences, and emerging advanced techniques. Software Applications: Concepts, Methodologies, Tools, and Applications Tiako, Pierre F., 2009-03-31 Includes articles in topic areas such as autonomic computing, operating system architectures, and open source software technologies and applications. *System Engineering Analysis, Design, and Development* Charles S. Wasson, 2015-12-02 Praise for the first edition: This excellent text will be useful to every system engineer, SE, regardless of the domain. It covers ALL relevant SE material and does so in a very clear, methodical fashion. The breadth and depth of the author's presentation of SE principles and practices is outstanding. Philip Allen: This textbook presents a comprehensive step-by-step guide to System Engineering analysis, design, and development via an integrated set of concepts, principles, practices, and methodologies. The methods presented in this text apply to any type of human system, small, medium, and large organizational systems, and system development projects delivering engineered systems or services across multiple business sectors such as medical, transportation, financial, educational, governmental, aerospace, and defense, utilities, political, and charity, among others. Provides a common focal point for bridging the gap between and unifying System Users, System Acquirers, multi-discipline System Engineering, and Project Functional and Executive Management education, knowledge, and decision making for developing systems, products, or services. Each chapter provides definitions of key terms, guiding principles, examples, author's notes, real-world examples, and exercises which highlight and reinforce key SE: specification, development, system architecture, development, User-Centric System Design (UCSD), interface definition, system integration, and Verification Life Cycle requirements, Phases, Modes, SE Process, Requirements Derivation, System Architecture Development, User-Centric System Design (UCSD), Engineering Standards, Coordinate Systems, and Conventions, et al. Thoroughly illustrated with end-of-chapter exercises and numerous case studies and examples. *Systems Engineering Analysis*
