

Career Essay

Construction management dates back as early as 1869 to 1883 when the Brooklyn bridge was constructed. Construction managers plan, direct, and coordinate usually through subordinate supervisory personnel, activities concerned with the construction and maintenance of structures, facilities and systems. They also work more than 40 hours a week and some projects require work for 24 hours a day. For my career I chose to be construction manager.

Construction management dates back to the Brooklyn bridge. Without construction management, jobs wouldn't get done. If construction managers were not on the job, the construction workers wouldn't know what to do. Standards within the profession became more elaborate after the construction manager method delivered high quality results. In the early 1980's, universities with their research teams started to conceptualize their corresponding Construction Management Programs. Construction managers recognized how they helped deliver high quality results as demanded by clients.

Construction management has also had some great innovations. Over the years construction managers got new technology like better computer systems. This can help plan and manage projects. This can also help manage schedules for workers. Construction managers also got more advanced tools and vehicles. The more advanced tools help complete a variety of projects. The vehicles help get around through tough terrain or to lift very heavy objects.

A challenge that Construction managers face are rising costs. Over the years, wages and materials cost more. Supplies and productivity cost more too. Another challenge that Construction managers face is time. Delivery of materials, supplies, and equipment is a challenge. Designing schedules for projects is also a challenge.

Hindman provides practical advice on how to conduct hiring interviews that reliably predict a teacher's success, including guidance on applying research to the interview process, developing meaningful legal interview questions, assembling and training an interview team, matching candidates' skills to your school's needs, and using the best interview strategies. Behavioral Interview Guide Tom S. Turner, 2004 Is your organization using the most effective type of interviewing in your hiring and promotional processes? Selection research results indicate that the most valid type of interview to use is a structured behavioral interview that is focused on the success-related knowledge, skills, and personal qualities. *Behavioral Interviewing Guide* provides you with a practical step-by-step approach for planning, conducting, and evaluating a structured behavioral interview. Some of the many supporting documents, guides, and techniques included in the book are: Selection criteria definitions, Twenty-five pages of categorized behavioral questions, Generic interview guides for both management and non-management positions, Self-assessment quiz, and Generic behavioural background reference check guide. By using the practices and techniques presented in the *Behavioral Interview Guide*, you will hire or promote good performers more often. Is it worth it? You bet! Selection research studies indicate good workers can do twice as much work as poor workers. In addition, each year a good worker is with an organization, they contribute a monetary value equivalent in the range of 70% to 140% of their annual salary. Bad decisions, equipment material damage, accidents, and replacement hiring fees are just some of the substantial costs associated with hiring or promoting poor workers. The behavioral interview is based on the practical assumption that a person's past behavior will predict their future behavior. If a person has demonstrated strong initiative, work standards, ability to learn, judgment, flexibility, honesty, attendance, etc. in past positions, they will, in all probability, continue to show the same behavior in future positions. The *Behavioral Interview Guide* provides you with hundreds of good behavioral questions to choose from and explains the necessary structure and steps to ensure interview success. **101**

Strategic Board Recruitment Robert W. Kile,J. Michael Loscavio,1996 Board recruitment is one of the most important and least understood functions of nonprofit boards The search for new members often involves well intentioned volunteers with little or no recruiting experience contacting well intentioned candidates with little or no board experience Such an approach to board recruitment is too limited in today's competitive nonprofit environment where leadership fund raising diversity and vision are needed more than ever The eight step Strategic Board Recruitment model is based on the systems and techniques used by executive search professionals it has been tailored to guide nonprofits in their ongoing efforts to strengthen their boards This model provides a framework for executing and institutionalizing a results oriented recruitment process Diagnostic Writing Assessment Ute Knoch,2009 The diagnostic assessment of writing is an important aspect of

language testing which has often been neglected in the literature. However, it is an area which poses special challenges to practitioners both in the classroom and in large scale testing situations. This book presents a study which set out to develop and validate a rating scale specifically designed for the diagnostic assessment of writing in an academic English setting. The scale was developed by analysing a large number of writing performances produced by both native speakers of English and learners of English as an additional language. The rating scale was then validated using both quantitative and qualitative methods. The study showed that a detailed data based rating scale is more valid and more useful for diagnostic purposes than the more commonly used impressionistic rating scale.
