LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module in the virtual lab.

MODULE 1: Introduction

At the beginning of the virtual lab, you were asked to select eight lizards from a category. What criteria did you use to select your group?

My criteria were: color, size, and shape of the lizards.

Did your teacher grade individual team efforts?

Yes, my teacher graded individual team efforts. We were given a list of questions to answer and we had to discuss our answers and explain our reasoning to the teacher.

An adaptation is a structure or function that the organism has as a population response to its environment. Give an example of an adaptation in a particular environment. Provide one example and an explanation of an adaptation in the desert lizard.

One example of an adaptation in the desert lizard is its ability to store water in its body. This is an adaptation to the dry environment of the desert.

Provide one evolutionary explanation for why lizards living in the desert have different traits (i.e., the group) would have evolved a characteristic.

One evolutionary explanation for why lizards living in the desert have different traits is that they have adapted to the dry environment by evolving traits that help them survive.
