**Assistive Augmentation** Jochen Huber, Roy Shilkrot, Pattie Maes, Suranga Nanayakkara, 2017-11-09 This book addresses Assistive Augmentation highlighting the design and development of assistive technologies user interfaces and interactions that seamlessly integrate with a user's mind body and behavior providing an enhanced perception Our senses are the dominant channel we use to perceive the world around us Whether they have impairments or not people often find themselves at the limits of their sensorial capabilities Some seek assistive or enhancing devices that enable them to carry out specific tasks or even transform them into a superhuman with capabilities well beyond the ordinary The overarching topic of this book revolves around the design and development of technologies and interfaces that provide enhanced physical sensorial and cognitive capabilities Assistive Augmentation The Assistive Augmentation community convened at an interdisciplinary workshop at the 2014 International Conference on Human Factors in Computing Systems CHI in Toronto Canada The community is comprised of researchers and practitioners who work at the junction of human computer interaction assistive technology and human augmentation This edited volume which represents the first tangible outcome of the workshop presents stimulating discussions on the challenges of Assistive Augmentation as examined through case studies These studies focus on two main areas 1 Augmented Sensors and Feedback Modalities and 2 Design for Assistive Augmentation

**UbiComp 2002: Ubiquitous Computing** Gaetano Borriello, Lars E. Holmquist, 2002-09-18 Ubiquitous computing is coming of age In the few short years of the lifetime of this conference we have seen major changes in our emerging research community When the conference started in 1999 as Handheld and Ubiquitous Computing the field was still in its formative stage In 2002 we see the UbiComp conference the name was shortened last year emerging as an established player attracting research submissions of very high quality from all over the world Virtually all major research centers and universities now have research programs broadly in the field of ubiquitous computing Whether we choose to call it ubiquitous pervasive invisible disappearing embodied or some other variant of computing it is clear that Mark Weiser's original vision has only become more and more relevant since the term was coined over 10 years ago But most important in our context the interest in the field can be gauged from the rising number of full paper submissions to the conference from about 70 in both 1999 and 2000 to 90 in 2001 to this year's record breaking 136 Counting technical notes workshops poster and video submissions there were over 250 original works submitted to this year's conference This is an impressive effort by the research community and we are grateful to everyone who took time to submit their work without this the conference would simply not exist
