Jung On Active Imagination:

Jung on Active Imagination C. G. Jung, 2015-02-17 All the creative art psychotherapies art dance music drama poetry can trace their roots to C G Jung's early work on active imagination Joan Chodorow here offers a collection of Jung's writings on active imagination gathered together for the first time Jung developed this concept between the years 1913 and 1916 following his break with Freud During this time he was disoriented and experienced intense inner turmoil he suffered from lethargy and fears and his moods threatened to overwhelm him Jung searched for a method to heal himself from within and finally decided to engage with the impulses and images of his unconscious It was through the rediscovery of the symbolic play of his childhood that Jung was able to reconnect with his creative spirit In a 1925 seminar and again in his memoirs he tells the remarkable story of his experiments during this time that led to his self healing Jung learned to develop an ongoing relationship with his lively creative spirit through the power of imagination and fantasies He termed this therapeutic method active imagination This method is based on the natural healing function of the imagination and its many expressions Chodorow clearly presents the texts and sets them in the proper context She also interweaves her discussion of Jung's writings and ideas with contributions from Jungian authors and artists

Jung on Active Imagination Carl Gustav Jung, 1997 Jungian analyst Joan Chodorow brings together a key selection of Jung's writings on active imagination In her introduction she clearly explains Jung's methods of achieving self knowledge and individuation

Jung's Technique of Active Imagination and Desoille's Directed Waking Dream

Method Laner Cassar, 2020-06-07 Jung's Technique of Active Imagination and Desoille's Directed Waking Dream Method brings together Carl Jung's active imagination and Robert Desoille's *revue veill dirig* directed waking dream method RED It studies the historical development of these approaches in Central Europe in the first half of the 20th century and explores their theoretical similarities and differences proposing an integrated framework of clinical practice The book aims to study the wider European context of the 1900s which influenced the development of both Jung's and Desoille's methods This work compares the spatial metaphors of interiority used by both Jung and Desoille to describe the traditional concept of inner psychic space in the waking dreams of Jung's active imagination and Desoille's RED It also attempts a broader theoretical comparison between the procedural aspects of both RED and active imagination by identifying commonalities and divergences between the two approaches This book is a unique contribution to analytical psychology and will be of great interest for academics researchers and post graduate students interested in the use of imagination and mental imagery in analysis psychotherapy and counselling The book's historical focus will be of particular relevance to Jungian and Desoillian scholars since it is the first of its kind to trace the connections between the two schools and it gives a detailed account of Desoille's early life and his first written works This book was a Grady Award nominee for 2021

Jung and the Alchemical Imagination Jeffrey Raff, 2000-11-15 Jung and the Alchemical Imagination illustrates the spiritual nature of Jungian

psychology and the debt it owes to the tradition of esoteric religion Unlike other books on Jung and alchemy which contain a psychological interpretation of alchemical material this work uses alchemy to understand the three cornerstones of Jungian spirituality the self the transcendent function and active imagination Through the interpretation of alchemical imagery Raff explains the nature of these three concepts and illustrates how together they form a new model of contemporary Western spirituality This book is also unique in selecting alchemical texts for analysis that are relatively unknown and which for the most part have never been interpreted In addition he presents two new concepts the ally and the psychoid realm Through the addition of these ideas and the new understanding that they offer it is possible to apply alchemical imagery to transpsychic experience that is to a world of spirits which may not be reduced to psychological concepts By including this realm in the study of alchemy and Jungian thought it is possible to gain insights into the nature of visionary and ecstatic experiences that form part of the path of individuation the road to completion

Jung on Active Imagination C. G. Jung, 1996 *Old Wise Woman* Rix Weaver, 2001-05-01 This book was one of the first works made available to a general readership on the subject of Active Imagination, a technique developed by C. G. Jung in which the imaginal world is entered deliberately while awake in order to gain self-knowledge and resolve conflicts. In it, Rix Weaver presents an account of her work of Active Imagination with one of her analysands, a process that began with a dream and yielded a personal myth recounted here with amplification and commentary. Alchemical Active Imagination

Marie-Louise von Franz, 2017-06-13 A leading Jungian psychologist reveals the relationship between alchemy and analytical psychology, delving into the visionary work of a sixteenth-century alchemist. Although alchemy is popularly regarded as the science that sought to transmute base physical matter, many of the medieval alchemists were more interested in developing a discipline that would lead to the psychological and spiritual transformation of the individual. C. G. Jung discovered in his study of alchemical texts a symbolic and imaginal language that expressed many of his own insights into psychological processes. In this book, Marie-Louise von Franz examines a text by the sixteenth-century alchemist and physician Gerhard Dorn in order to show the relationship of alchemy to the concepts and techniques of analytical psychology. In particular, she shows that the alchemists practiced a kind of meditation similar to Jung's technique of active imagination, which enables one to dialogue with the unconscious archetypal elements in the psyche. Originally delivered as a series of lectures at the C. G. Jung Institute in Zurich, the book opens therapeutic insights into the relations among spirit, soul, and body in the practice of active imagination. Active Imagination in Theory, Practice and Training

Chiara Tozzi, 2024 Based on extensive research and developed with the support of the IAAP, this fascinating new work presents the precious value of the special legacy of C. G. Jung, which he himself defined as Active Imagination, through a collection of unpublished contributions by some of the brightest Jungian analysts and renowned representatives from the world of Art, Culture, Physics, and Neurosciences. In addition to presenting the genesis, development, and results of Chiara Tozzi's research on Active Imagination, this volume on Theory, Practice, and Training will also include the fundamental theoretical aspects of this technique. The book explores Active Imagination in relation to fundamental contents of Analytical Psychology, such as Individuation, Transformation, and comparison with the Shadow, the four psychological functions, C. G. Jung's Red Book, and more. Moreover, the connections between Active Imagination and Sandplay will also be explored, as well as the possibilities of applying the technique with adolescent patients, how it is considered and proposed in Jungian Training, and some innovative clinical methodologies of Active Imagination. Spanning two volumes, which are also accessible as standalone books, this essential collection will be of great interest to Jungian analysts, psychologists, psychoanalysts, or anyone interested in discovering more about the fascinating psychotherapeutic practice of Active Imagination and its interdisciplinary uses. *The Active Imagination* C. G.

Jung, 2025-07-15 Jung's landmark seminar on the psychotherapeutic method of active imagination In the fall of 1931 C. G. Jung gave an intensive series of seminars on the use of active imagination in clinical practice Delivered at the Hotel Sonne in Zurich these lectures describe a technique in which subjects are encouraged to deliberately invoke their fantasies in a waking state and paint or sculpt the images that arise and even engage in dialogue with the characters that appear Here for the first time in English is Jung's seminar on the theory and application of active imagination offering unparalleled insights into his most distinctive contribution to psychotherapeutic method These illuminating talks center on paintings and drawings done by Jung's patients in clinical sessions Tracing connections between the spontaneous products of the individuation process and Eastern esoteric traditions Jung demonstrates how these images stem from the collective unconscious and can be understood through mythological parallels including those of Tantrism and Kundalini Yoga which he was exploring at the time He shows how the use of active imagination can promote the further individuation of patients With explanations of Jungian concepts and terminology *The Active Imagination* sheds light on the foundational role of Jung's thought in the development of modern art therapy and opens a window on a therapeutic method that he pioneered years earlier during self analysis and recorded in the legendary Red Book
