Campus counseling services today must face the challenges of greater diversity and complexity on campus while making do with fewer resources. In order to be maximally effective they must be willing to engage with other services within and beyond the campus itself. This comprehensive manual for campus mental health and student affairs professionals is specifically designed to provide the most current information available regarding critical issues impacting the mental health and educational experiences of today's college students. It is unique in its focus on outreach beyond the walls of the counseling center and how counseling services can coordinate their efforts with other on and off campus institutions to expand their reach and provide optimal services. Written for both mental health counselors and administrators, the text addresses ethical and legal issues, campus outreach, crisis and trauma services, substance abuse, sexual minorities, spiritual and religious issues, bullying and aggression, web-based counseling, and psychoeducational services. The authors of this text distill their expertise from more than 30 years of combined experience working and teaching in a variety of college and university counseling centers throughout the United States. The book serves as both a comprehensive text for courses in college counseling and college student affairs and services as well as an all-inclusive manual for all college and university mental health and student affairs professionals.

Manual of Disaster Medicine N.D. Reis, Eran Dolev, 2012-12-06 This book is not a learned treatise Its purpose is to render practical instruction to all those physicians surgeons administrators and paramedical personnel who have to act in war or disaster situations As a manual it is in no way a substitute for existing detailed and specialized texts on the various aspects of trauma surgery and management rather have we attempted to collate the most essential knowledge required to organize and afford medical aid whenever civilian or military disaster strikes The man on the spot is hardly ever a specialist hence the need for a simple general manual of instruction The organizational aspects of medical services in war are very similar to those required for coping with a disaster indeed the military are often called to cope with civilian disasters Our duty is to be prepared so as not to lose life and limb for lack of foresight There are repetitions in the book for which no apologies are made since they always concern invaluable knowledge The chapters are organized to afford an understanding of the organization of medical services the cause of wounds and traumatic disease and the pathophysiological processes resulting from the different kinds of trauma The management of treating casualties is divided in each section into the three basic elements on site at the actual place of wounding at the medical battalion aid station and in the field or base hospital *Teacher Manual*, 1985
