Schmid, Wander Lowie, 2011-03-14 This volume presents an overview of changes in paradigms perspectives and contexts of research into bilingual development over the past two decades During this time the focus of perspective has changed In the early 1990s most investigations still proceeded from models that assumed modular components hierarchical relationships and linear processes and investigated what were perceived to be the typical contexts of bilingual development sequential usually instructed bilingualism where the second language would remain the weaker one and the speakers investigated were typically young adults More recently it has been proposed that such models may not be complex enough to accommodate bilingual development in all its facets and settings bimodal bilingualism attrition aging This change has recently culminated in applications of chaos theory to Applied Linguistics and in the widening range of situations of language acquisition learning and deterioration which have been investigated *Handbook of Undergraduate Second Language Education* ,
