Micro and Nanostructured Composite Materials for Neutron Shielding Applications

Sajith Thottathil Abdulrahman, Sabu Thomas, Zakiah Ahmad, 2020-06-30 Micro and Nanostructured Composite Materials for Neutron Shielding Applications presents recent developments and future possibilities for neutron shielding materials. Emphasis is placed on the correlation between the morphology, shielding mechanisms, and other desired properties, including their mechanical and thermal properties. The effect of neutron absorbing fillers, including their size, on final properties is also examined, as are recent advancements in preparation, characterization, and simulation techniques. Written by specialists in their respective fields, this comprehensive resource will help professionals and students understand the fundamentals of neutron shielding, as well as the properties of micro and nanopolymer based composites, concrete materials, alloy materials, and metal ceramic composites. Provides an up to date understanding of the fundamentals of shielding mechanisms, morphology, and material property correlations. Covers a broad range of micro and nano composite materials for neutron shielding. Discusses recent advances surrounding the synthesis and processing of nanostructures and nanocomposite materials.
