ENVIRONMENTAL SCIENCE**

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Score: \_\_\_\_\_/65

Instructor: Shermain V. Jacob

Section: \_\_\_\_\_

**I. MULTIPLE CHOICE**

Directions:

- ✓ Read each statement carefully. Select the correct letter that best suits your answer by writing the letter of the correct answer on the answer sheet provided. If the correct answer is not on the choices, please write the correct answer on your answer sheet.
  - ✓ Erasure is not allowed.
  - ✓ Follow the instructions carefully.
  - ✓ Avoid any kind of cheating.
  - ✓ Pray for wisdom.
1. It is a group of interacting organisms of the same species and includes individuals of all ages or stages: pre-reproductive juveniles and reproductive adults.  
a. Demography                      b. Biodiversity                      c. Ecology                      **d. Population**
  2. These are the three processes are relevant to demography.  
**a. Fertility, Mortality, and Migration.**                      c. Education, Religion, and Ethnicity  
b. Size, Growth, and Processes                      d. Birth, death, and Fate
  3. These are only two ways to enter a population.  
a. Mortality and In-Migration                      c. Birth and Death  
**b. Birth and In-Migration**                      d. Fertility and In-Migration
  4. There are two ways to leave a population. These are \_\_\_\_\_.  
a. Mortality and Out-Migration                      **c. Death and Out-Migration**  
b. Birth and Out-Migration                      d. Fertility and Out-Migration
  5. It is the maximum reproductive capacity of a population under optimum environmental conditions.  
a. Birth Potential                      b. Abiotic Potential                      **c. Biotic Potential**                      d. Death Potential
  6. Which of the following is the factor that regulates the biotic potential of organisms?  
a. Capacity for Survival                      c. Length of Reproductive Life  
b. Breeding Frequency                      **d. All of the above**
  7. This is the maximum number of individuals of a species that can be supported by an ecosystem.  
**a. Carrying Capacity**                      c. Density Independent Factors  
b. Density Dependent Factors                      d. Demography
  8. A factor that affects members of a population because of population density. Examples: food supply, disease, exotic species, increased predation, competition.  
a. Carrying Capacity                      c. Density Independent Factors  
**b. Density Dependent Factors**                      d. Demography
  9. It is the study of human population dynamics.  
a. Carrying Capacity                      **c. Demography**  
b. Density Dependent Factors                      d. Density Independent Factors
  10. This is how long in an animal's life that it can produce offspring. Ex. African elephants can reproduce until they are about 90 years old but can't start reproducing until they are 15. So they can reproduce for approximately 75 years.  
**a. Length of Reproductive Life**                      c. Capacity for Survival  
b. Breeding Frequency                      d. Demography
  11. This is the number of offspring that reach reproductive age. Ex. Turtles lay tons of eggs at a time but only a few make it to the ocean and then even fewer actually live to reproductive age.  
a. Length of Reproductive Life                      c. Breeding Frequency  
**b. Capacity for Survival**                      d. Demography
  12. It refers to the ability of females to produce healthy offspring in abundance.  
a. Mortality                      b. Fecundity                      **c. Fertility**                      d. Birth
  13. A factor that affects a population regardless of population density Examples: flood, fire, pesticides, destruction of habitat, drought.  
a. Carrying Capacity                      c. Demography  
b. Density Dependent Factors                      **d. Density Independent Factors**

**WASTES 2015 - Solutions, Treatments and Opportunities** Candida Vilarinho,Fernando Castro,Mário Russo,2015-09-04 This volume presents a selection of papers from the WASTES 2015 conference a platform for scientists and industries from the waste management and recycling sectors from around the world who shared experiences and knowledge at the meeting Covering discussions regarding the balance between economic environmental and social outcomes the development of innovative techniques tools and strategies on how wastes can be transformed into good ideas Improving both the overall environmental performance and the understanding of the industry impact on the environment as well as the options analysis for its improvement were key objectives of this conference *The Mega Yearbook 2020 for Competitive Exams - 5th Edition* Disha Experts,2019-12-04 Wetlands and Water Resources: Ecological Solutions for the Environment Guangzhi Sun,Xiaofei Yu,Yuanchun Zou,Guobin Fu,2023-04-12 Wetlands are usually located in complex landscapes Multiple ecosystem services delivered by wetlands to human well being should be considered in broader contexts of wetland functions

water quality water resource management and wetland conservation Natural wetlands are kidneys and sponges of the earth that remove water pollutants and provide hydrological regulation functions vital to the environment Where the functions of the wetlands are weakened actions of rehabilitations are needed to revitalize those functions While worldwide many natural wetlands have disappeared due to climate change and or human activities constructed wetlands which may be seen as artificial kidneys sponges of the earth have been increasingly built to replicate the functions of the natural wetlands This Research Topic aims to collect and present the latest research developments in natural and constructed wetlands in relation to either water resource functions or water quality Articles published in this Research Topic will showcase new understandings of water balances and flow patterns vegetation characteristics and pollutant transformations in wetland systems innovative designs and efficiencies of wastewater treatment wetlands and technologies that revitalize the ecosystem functions of natural wetlands These articles are expected to bring benefits to research communities water and wastewater industries and government agencies that deal with wetland water management and conservation High quality Original Research and Review articles in this field are all welcome for submission to this Research Topic Research interests include but are not limited to the following areas 1 Water balances and flow patterns in natural wetland systems 2 The hydrological regulation functions and importance of natural wetlands in their environmental context 3 Vegetation characteristics of natural wetlands and their functional importance in wetland water pollution control 4 Techniques for the rehabilitation of degraded wetlands 5 The role of constructed wetlands in wastewater treatment 6 Innovative designs and efficiencies of wastewater treatment wetlands 7 The modeling of hydrological and or pollutant dynamics in wetland systems 8 The ecohydrology of wetlands 9 The role of wetlands in the global carbon cycle 10 Impacts of climate change and human activities on wetland hydrology and water resources Recognizing that hydrological and biogeochemical processes are basically coupled in wetlands and their landscapes manuscripts that report their interactions are particularly welcome

**Evolution of International Aviation** Dawna L. Rhoades, 2016-04-15 The purpose of this book is twofold First it lays out the forces that shaped the international aviation industry and that changed all the rules in the drive for liberalization Second it looks at the many interesting and difficult choices ahead that the airline industry in general and the international aviation industry in particular face These choices include many dichotomies pulling back from the trend toward liberalization or embracing the liberalization trend merging in search of profitability or fragmenting the industry in search of economies These possible futures are explored including the pros and cons of each future from a national consumer employer and employee perspective As with the previous two editions *Evolution of International Aviation* reviews the historical development of the international aviation system From this foundation it then provides an updated and expanded account of the current state of the aviation and aerospace industry including profitability consolidation and merger activity New to this edition the book broadens the coverage of the industry segments airlines air cargo and manufacturing to include the

emerging commercial space sector It also emphasizes the relationship between aviation and the political process exploring the sustainability of this mode of transportation in a world of climate change high oil prices and political instability Because this book is intended for both the interested amateur and the more serious student references are provided in the text and at the end of each chapter to allow for further in depth study The third edition also adds to each chapter a set of learning objectives and a concluding series of questions for discussion

**Nature-Based Solutions for Natural Hazards and Climate Change** Borja Gonzalez Reguero,Fabrice Renaud,Silvana Di Sabatino,Brenden Jongman,Boris van Zanten,Michael W. Beck,Emmanuelle Cohen-Shacham,2023-01-27

**Environmental Risk and Corporate Behaviour** Rui Xue,Haiyue Liu,Ruidong Chang,Di Bu,Shiyang Hu,2024-09-19 The accelerating global climate change risk highlights the importance of a quick transition towards a cleaner world Although steady progress has already been made globally substantial improvement cannot be achieved without sufficient financial support especially during the post COVID 19 recovery period where countries worldwide have to prioritize the economic recovery which might limit the support for climate change mitigation and adaptation Firms are the main greenhouse gas emitters and their contributions to the green transition thus are of vital importance to achieving a low carbon transition However firms normally lack motivation to make green efforts even worse the business lockdowns and the supply chain disruptions during the pandemic have further weakened their already minimal commitment to mitigating climate change risks

*ECGBL2013-Proceedings of the 6th European Conference on Games Based Learning* Patrick Felicia,2012

**Environmental Contamination Solutions for Complex Heterogeneous Systems** Ravi Naidu,Balaji Seshadri,Aravind Surapaneni,2023-03-07

*Design Solutions for User-Centric Information Systems* Saeed, Saqib,Bamarouf, Yasser A.,Ramayah, T.,Iqbal, Sardar Zafar,2016-12-21 Continuous improvements in technological applications have allowed more opportunities to develop systems with user focused designs This not only leads to higher success in day to day usage but it increases the overall probability of technology adoption Design Solutions for User Centric Information Systems provides a comprehensive examination of the latest strategies and methods for creating technological systems with end users as the focal point of the design process Highlighting innovative practices and applications across a variety of areas such as cloud based computing services e government adoption and logistics evaluation this book is an ideal reference source for computer engineers practitioners project managers graduate students and researchers interested in the enhancement of user centric information system development
