"Science, Technology, and Utopias" Christine Filippone, 2017-07-05 The rise of proxy wars the Space Race and cybernetics during the Cold War marked science and technology as vital sites of social and political power Women artists historically excluded from these domains responded critically while simultaneously redeploying the products of Technological Society into works that promoted ideals of progress and alternative concepts of human community In this innovative book author Christine Filippone offers the first focused examination of the conceptual use of science and technology by women artists during and just after the women's movement She argues that artists Alice Aycock Agnes Denes Martha Rosler and Carolee Schneemann used science and technology to mount a critique on Cold War American society as

they saw it conservative and constricting Motivated by the contemporary American Women s Movement these artists transformed science and technology into new modes of artmaking that transgressed modernist heroic painterly styles and subverted the traditional economic structures of the gallery the museum and the dealer At the same time the artists also embraced these domains of knowledge and practice as expressions of hope for a better future Many found inspiration in the scientific theory of open systems which investigated problems of wholeness dynamic interaction and organization enabling consideration of the porous boundaries between human bodies and their social political and nonhuman environments Filippone also establishes that the theory of open systems not only informed feminist art but also continued to influence women artists practice of reclamation and ecological art through the twenty first century Holt Science and Technology Holt Rinehart & Winston,Holt, Rinehart and Winston Staff,2001 **Holt Anthology of Science Fiction** Holt Rinehart & Winston,2000-05 Includes an introduction to the genre of science fiction stories relating to the various areas of science by leading authors in the field Bibliographical information on authors References for additional reading Critical thinking questions *Islands' Spirit Rising* Louise Takeda,2014-12-10 The islands of Haida Gwaii contain some of the last remaining tracts of intact coastal temperate rainforest in the world Aggressive logging over the past century however has threatened not only the unique biodiversity and habitat values but also the cultural values of the Haida people who have relied on these forests for millennia *Islands Spirit Rising* examines the long term conflict over the islands ancient forests and recent events that unfolded in the context of collaborative land use planning In response to threats posed by a century of logging a local indigenous environmental community movement built enough momentum to challenge the multinational forest industry and the political structures enabling it This book traces the evolution of this dynamic force from the early days of Haida resistance to the modern context of alliances legal battles and evolving forms of governance Nature-Based Solutions for Natural Hazards and Climate Change Borja Gonzalez Reguero,Fabrice Renaud,Silvana Di Sabatino,Brenden Jongman,Boris van Zanten,Michael W.
