

# 8.2 Structure of DNA

KEY CONCEPT DNA structure is the code of all organisms.

## DNA is composed of four types of nucleotides.

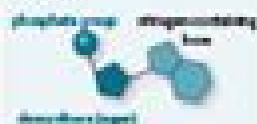

Since the 1920s scientists have known the chemical parts of the DNA molecule. DNA is a very long polymer, or chain of repeating units. The units, or monomers, that make up DNA are called **nucleotides** (NCOO-lee-oh-ee-oh). Each nucleotide has three parts: a phosphate group, a base, and a sugar.

There are four different types of DNA nucleotides: cytosine (C), thymine (T), adenine (A), and guanine (G). All of the nucleotides contain a phosphate group and a deoxyribose sugar. They differ in their nitrogen-containing bases, as shown in the table below.

Notice that thymine (T) and cytosine (C) have nitrogen-containing bases with a single-ring structure. Adenine (A) and guanine (G) are bases with a double-ring structure. A single molecule of human DNA is made of billions of nucleotides.

### MONOMER: NUCLEOTIDE

The small units, or monomers, that make up a strand of DNA are called **nucleotides**. Each nucleotide has three parts.

- phosphate group: one phosphate with four oxygens
- deoxyribose: ring deoxyribose
- nitrogen-containing base: a single- or double-ring built around nitrogen atoms and carbon atoms

### THE FOUR NITROGEN-CONTAINING BASES OF DNA

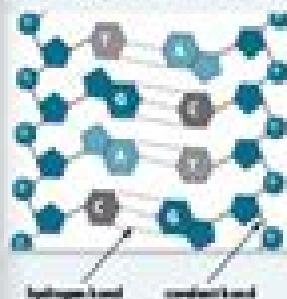

PYRIMIDINE – SINGLE RING			PURINE – DOUBLE RING		
Name of base	Structural formula	Model	Name of base	Structural formula	Model
thymine			adenine		
cytosine			guanine		

Circle the names of the four nucleotides shown in the table above.

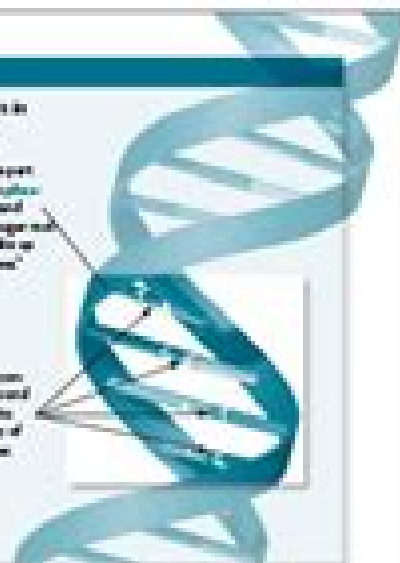

### BASE PAIRING RULES

The base pairing rules describe how nucleotides form pairs in DNA. T always pairs with A, and C always pairs with G.

The phosphate part represents the phosphate group and deoxyribose sugar molecules that make up DNA's "backbone."

The nitrogen-containing bases bond to the middle to form the rungs of the DNA ladder.

What sequence of bases would pair with GTACG?

### 8.2 Vocabulary Check

#### Mark It Up

nucleotide  
double helix

base pairing rules

Go back and highlight each sentence that has a vocabulary word in bold.

Label the drawing at the right with the terms **nucleotide**, **base pairing rules**, and **double helix**. Write each term and draw a line that connects the term to the appropriate part of the drawing.

### 8.2 The Big Picture

What are the three different parts of a nucleotide? \_\_\_\_\_

What are the names of the four nucleotides? \_\_\_\_\_

Use the base pairing rules to write the sequence that would pair with the following sequence: TCACGTA \_\_\_\_\_
