### ENERGY CONSERVATION

*An Energy Conservation Plan is your best insurance against waste. Energy is Money. Don't Waste It!!*

#### Follow these recommendations:

1. Be sure that proper lubrication and maintenance procedures are followed. Review Operator's Manual thoroughly.
2. Take care to match weight equipment (front and rear) and tire pressure to conform to operational requirements, soil conditions, traction, etc.
3. Be sure the equipment is properly adjusted to the task being performed. Review Operator's Manual thoroughly.
4. Match as closely as possible the tractor size (horsepower) to implement size and soil conditions.
5. Be sure the operator is thoroughly trained in the operation of the equipment. Review Operator's Manual thoroughly.
6. Be sure to select the proper speed range and speed gear for the job in hand to allow engine operation at or near rated speed. Avoid lugging conditions.

 James R. Crawford,2007-03-15 Statehood in the early 21st century remains as much a central problem as it was in 1979  
 when the first edition of The Creation of States in International Law was published As Rhodesia Namibia the South African  
 Homelands and Taiwan then were subjects of acute concern today governments international organizations and other  
 institutions are seized of such matters as the membership of Cyprus in the European Union application of the Geneva  
 Conventions to Afghanistan a final settlement for Kosovo and still relations between China and Taiwan All of these and many  
 other disputed situations are inseparable from the nature of statehood and its application in practice The remarkable  
 increase in the number of States in the 20th century did not abate in the twenty five years following publication of James  
 Crawford s landmark study which was awarded the American Society of International Law Prize for Creative Scholarship in  
 1981 The independence of many small territories comprising the residue of the European colonial empires alone accounts for  
 a major increase in States since 1979 while the disintegration of Yugoslavia and the USSR in the early 1990s further  
 augmented the ranks With these developments the practice of States and international organizations has developed by  
 substantial measure in respect of self determination secession succession recognition de colonization and several other fields  
 Addressing such questions as the unification of Germany the status of Israel and Palestine and the continuing pressure from  
 non State groups to attain statehood even in cases like Chechnya or Tibet against the presumptive rights of existing States  
 James Crawford discusses the relation between statehood and recognition the criteria for statehood especially in view of

evolving standards of democracy and human rights and the application of such criteria in international organizations and between states Also discussed are the mechanisms by which states have been created including devolution and secession international disposition by major powers or international organizations and the institutions established for Mandated Trust and Non Self Governing Territories Combining a general argument as to the normative significance of statehood with analysis of numerous specific cases this fully revised and expanded second edition gives a comprehensive account of the developments which have led to the birth of so many new states The Essential Guide to Critical Development Studies Henry Veltmeyer,Paul Bowles,2021-09-30 The Essential Guide to Critical Development Studies provides an up to date and authoritative introduction to the field challenging mainstream development discourse and the assumptions that underlie it Critical development studies lays bare the economic political social and environmental crises that characterise the current global capitalist system proposing instead systemic change and different pathways for moving beyond capitalism into a new world of genuine progress where economic and social justice and ecological integrity prevail In this book the authors challenge market driven neoliberal development agendas incorporating analyses of class gender race and the dynamics of uneven capitalist development This thoroughly revised and expanded second edition includes 18 new chapters including on topics such as philanthrocapitalism race the energy transition Indigenous resistance and resilience and global health Expanded global coverage including new chapters on South Africa North Africa and the Gulf Arab states A new section on resistance and alternatives Additional pedagogical features including a glossary of key terms discussion questions and expanded guides for further reading This textbook will be essential reading for students of global development political science sociology economics gender studies geography history anthropology agrarian studies international political economy and area studies It will also be an important resource for development researchers practitioners and policymakers
