**Closing the Gap in Education and Technology** David M. De Ferranti,2003 The fundamental elements to unlocking the potential of technology to speed up economic growth in Latin America and the Caribbean LAC are investing in education opening up new technologies through foreign trade and investment and encouraging private sector research and development Closing the Gap in Education and Technology advises Latin American and Caribbean governments

to address the region's deficits in skills and technology and thereby boost productivity ultimately improving growth prospects. To close this productivity gap in the region, the report calls for a range of policy approaches and strategies depending on a country's level of development. It identifies three progressive stages in a country's technological evolution: adoption, adaptation, and creation, and observes that policies should be designed to address the particular challenges that accompany each stage. In conclusion, *Closing the Gap in Education and Technology* argues that many countries in the Latin American and Caribbean region have been improving education and social risk management systems so that they are now ready to benefit from the rewards associated with creating stronger trade and technology ties with countries that are more technologically advanced.

**E-Learning for GP Educators** John Sandars, Mayur Lakhani, Dr. Ian Banks, 2018-10-08 This work includes a Foreword by Mayur Lakhani, Chairman of Council Royal College of General Practitioners. General practitioners as a widely dispersed group are particularly reliant on e-learning. This book provides an overview of the topic and examines the past, present, and future challenges, opportunities, and benefits. With chapters devoted to creating a website, running short courses, and standards and accreditation, this guide explores both vocational training and continuing professional development. It presents an evidence-based, practical approach for healthcare educators and practitioners with teaching responsibilities, course organisers, and healthcare professionals with an interest in e-learning. Excellent leading edge. As a practising GP, I know just how hard it can be to keep up to date in a generalist discipline and showing progress. Having access to information is the straightforward bit; processing it and embedding it into clinical practice is the much bigger challenge, as this book rightly points out. As a user of e-learning, I know how useful this technique can be if undertaken properly and to a defined standard. I have no doubt that this book will be a valuable contribution to creating an innovative learning culture and society in healthcare. Mayur Lakhani in his Foreword.
